Question	Answer	Comment
The cooler's custody seal is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?	N/A

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
F2	MS/MSD RPD exceeds control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1-	Surrogate recovery exceeds control limits, low biased.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Dioxin

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
I	Value is EMPC (estimated maximum possible concentration).
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)

Narrative

Job Narrative 240-181894-1

Receipt

The samples were received on 3/14/2023 7:20 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 3.5°C, 3.8°C and 4.0°C

GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-565827 was outside the method criteria for the following analyte: Vinyl chloride. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

Method 8260D: The following sample(s) were received in pre-weighed containers with a label that was added in the field, which would cause a slight low bias in the final results: WC-S. TRK-WEST-08 (8-10) (240-181894-9), WC-S. TRK-WEST-09 (10-12) (240-181894-10), WC-S. TRK-WEST-10 (10-12) (240-181894-11), WC-S. TRK-WEST-11 (12-14) (240-181894-12), WC-S. TRK-WEST-12 (12-14) (240-181894-13), WC-S. TRK-WEST-13 (14-16) (240-181894-14), WC-S. TRK-WEST-14 (14-16) (240-181894-15), (240-181894-C-15 MS) and (240-181894-C-15 MSD).

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-565699 recovered above the upper control limit for Bromomethane, Dichlorodifluoromethane, Trichlorofluoromethane and Vinyl chloride. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260D: The MS/MSD for preparation batch 240-565503 and analytical batch 240-565878 is not reported because it was analyzed in another batch.

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-565878 recovered above the upper control limit for Bromomethane, Dichlorodifluoromethane, Trichlorofluoromethane and Vinyl chloride. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-565910 recovered outside acceptance criteria, low biased, for Pentachlorophenol. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for the analyte, the data are reported. The following samples were impacted: WC-S. TRK-WEST-COMP (08-14) (240-181894-16) and (240-181902-A-1-J).

Method 8270E: The following samples were diluted to bring the concentration of target analytes within the calibration range: WC-S. TRK-WEST-08 (8-10) (240-181894-9), WC-S. TRK-WEST-09 (10-12) (240-181894-10), WC-S. TRK-WEST-10 (10-12) (240-181894-11), WC-S. TRK-WEST-11 (12-14) (240-181894-12), WC-S. TRK-WEST-12 (12-14) (240-181894-13), WC-S. TRK-WEST-13 (14-16) (240-181894-14) and WC-S. TRK-WEST-14 (14-16) (240-181894-15). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Herbicides

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

PCBs

Method 8082A: The following samples required a tetrabutylammonium sulfite (TBA) clean-up to reduce matrix interferences caused by sulfur: WC-S. TRK-WEST-COMP (08-14) (240-181894-16).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Case Narrative

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-181894-1

Job ID: 240-181894-1 (Continued)

Laboratory: Eurofins Canton (Continued)

Pesticides

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Dioxin

Method 8290A: Any peak area that is the result of interferences from poly-chlorinated diphenyl ethers observed in the sample has been removed from the calculated results prior to reporting the data for totals.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
The cooler's custody seal is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace $>6\text{mm}$ in diameter (none, if from WV)?	N/A

JOB DESCRIPTION

NS East Palestine

JOB NUMBER

240-182146-1

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*3	ISTD response or retention time outside acceptable limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC/MS Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
F2	MS/MSD RPD exceeds control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Dioxin

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
I	Value is EMPC (estimated maximum possible concentration).
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)

Comments

No additional comments.

Receipt

The samples were received on 3/17/2023 7:00 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 5.1° C.

All soil samples collected in TerraCore kits were frozen within 48hours of collection.

GC/MS VOA

Method 5035: The following samples were received in pre-weighed containers with a label that was added in the field, which would cause a slight low bias in the final results: WC-VB1402-PLASTIC PELLETS (240-182146-1), WC-VB1344-PLASTIC PELLETS (240-182146-2), WC-VB1108-PLASTIC PELLETS (240-182146-3) and WC-SB1597-SOIL & DEBRIS (240-182146-6).

Method 8260D: The MS/MSD for preparation batch 240-566125 and analytical batch 240-566130 was prepped and analyzed but is not reported because the parent sample was reported in another batch.

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566130 recovered above the upper control limit for 1,1,1-Trichloroethane, Bromomethane, Carbon tetrachloride and Dichlorodifluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260D: Internal standard (ISTD) response for the following samples was outside control limits: WC-VB1344-PLASTIC PELLETS (240-182146-2) and WC-VB1108-PLASTIC PELLETS (240-182146-3). The samples were re-extracted and/or re-analyzed and ISTD response was outside control limits.

Method 8260D: Surrogate recovery for the following samples was outside control limits: WC-VB1344-PLASTIC PELLETS (240-182146-2) and WC-VB1108-PLASTIC PELLETS (240-182146-3). Re-extraction and/or re-analysis was performed and surrogate recovery was outside control limits.

Method 8260D: Surrogate recovery for the following sample was outside the upper control limit: WC-SB1597-SOIL & DEBRIS (240-182146-6). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566249 recovered above the upper control limit for Dichlorodifluoromethane. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.

Method 8260D: Internal standard (ISTD) response for the following samples was outside control limits: WC-VB1402-PLASTIC PELLETS (240-182146-1). The samples were re-extracted and/or re-analyzed and ISTD response was outside control limits.

Method 8260D: Surrogate recovery for the following samples was outside control limits: WC-VB1402-PLASTIC PELLETS (240-182146-1). Re-extraction and/or re-analysis was performed and surrogate recovery was outside control limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-566308 recovered above the upper control limit for Di-n-octyl phthalate. The samples associated with this CCV were non-detect for the affected analyte; therefore, the data have been reported. The associated samples are impacted: WC-VB1402-PLASTIC PELLETS (240-182146-1), WC-VB1344-PLASTIC PELLETS (240-182146-2), WC-VB1108-PLASTIC PELLETS (240-182146-3) and WC-SB1597-SOIL & DEBRIS (240-182146-6).

Method 8270E: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 240-566028 and analytical batch 240-566308 were outside control limits for one or more analytes. Sample matrix interference and/or non-homogeneity are suspected

Case Narrative

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182146-1

Job ID: 240-182146-1 (Continued)

Laboratory: Eurofins Canton (Continued)

because the associated laboratory control sample (LCS) recovery is within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin

Method 8290A: Any peak area that is the result of interferences from poly-chlorinated diphenyl ethers observed in the sample has been removed from the calculated results prior to reporting the data for totals.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep

Method Summary

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182146-1

Method	Method Description	Protocol	Laboratory
8260D	Volatile Organic Compounds by GC/MS	SW846	EET CAN
8270E	Semivolatile Organic Compounds (GC/MS)	SW846	EET CAN
8081B	Organochlorine Pesticides (GC)	SW846	EET CAN
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	EET CAN
8151A	Herbicides (GC)	SW846	ELLE
8290A	Dioxins and Furans (HRGC/HRMS)	SW846	ELLE
6010D	Metals (ICP)	SW846	EET CAN
7470A	Mercury (CVAA)	SW846	EET CAN
Moisture	Percent Moisture	EPA	EET CAN
Moisture	Percent Moisture	EPA	ELLE
1311	TCLP Extraction	SW846	EET CAN
1311	TCLP Extraction	SW846	ELLE
3010A	Preparation, Total Metals	SW846	EET CAN
3510C	Liquid-Liquid Extraction (Separatory Funnel)	SW846	EET CAN
3540C	Soxhlet Extraction	SW846	EET CAN
3546	Microwave Extraction	SW846	EET CAN
5030C	Purge and Trap	SW846	EET CAN
5035	Closed System Purge and Trap	SW846	EET CAN
7470A	Preparation, Mercury	SW846	EET CAN
8151A	Extraction (Herbicides)	SW846	ELLE
Composite	Sample Compositing	None	EET CAN
HRMS-Soxtherm	Soxtherm Extraction	EPA	ELLE

Question	Answer	Comment
The cooler's custody seal is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace $>6\text{mm}$ in diameter (none, if from WV)?	N/A	

Isotope Dilution Summary

Atlanta, Georgia 30308

Generated 3/31/2023 7:30:10 AM

JOB DESCRIPTION

NS East Palestine

JOB NUMBER

240-182202-1

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
*3	ISTD response or retention time outside acceptable limits.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC/MS Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Dioxin

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
I	Value is EMPC (estimated maximum possible concentration).
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
^+	Continuing Calibration Verification (CCV) is outside acceptance limits, high biased.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit

Comments

No additional comments.

Receipt

The samples were received on 3/18/2023 6:42 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 4 coolers at receipt time were 2.5° C, 3.7° C, 4.3° C and 4.3° C.

All soil samples collected in TerraCore kits were frozen within 48hours of collection.

GC/MS VOA

Method 5035: The following samples were received in pre-weighed containers with a label that was added in the field, which would cause a slight low bias in the final results: WC-S. TRACK-DEEP-01 (8-10') (240-182202-1), WC-S. TRACK-DEEP-02 (6-8') (240-182202-2), WC-S. TRACK-DEEP-03 (8-10') (240-182202-3), WC-S. TRACK-DEEP-04 (6-8') (240-182202-4), WC-S. TRACK-DEEP-05 (4-6') (240-182202-5), WC-S. TRACK-DEEP-06 (4-6') (240-182202-6), WC-S. TRACK-DEEP-07 (4-6') (240-182202-7), WC-S. TRACK-DEEP-08 (2-4') (240-182202-8), WC-S. TRACK-DEEP-09 (2-4') (240-182202-9), WC-S. TRACK-DEEP-10 (4-6') (240-182202-10), WC-SB1188-SOIL + DEBRIS (240-182202-13), WC-AMU112-SOIL + DEBRIS (240-182202-14), WC-SB2655-SOIL + DEBRIS (240-182202-15) and WC-SB2455-SOIL + DEBRIS (240-182202-16).

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566249 recovered above the upper control limit for Dichlorodifluoromethane. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.

Method 8260D: Surrogate recovery for the following samples was outside control limits: WC-S. TRACK-DEEP-05 (4-6') (240-182202-5) and WC-SB1188-SOIL + DEBRIS (240-182202-13). Re-extraction and/or re-analysis was performed and surrogate recovery was outside control limits.

Method 8260D: The MS/MSD for Prep Batch 240-566108 is not reported because the parent sample is reported as a low level soil sample.

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566133 recovered above the upper control limit for: 1,1,2-Trichloro-1,2,2-trifluoroethane and Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260D: The laboratory control sample (LCS) for preparation batch 240-566125 and analytical batch 240-566133 recovered outside control limits for the following analytes: 1,1,2-Trichloroethane, Toluene and Xylenes, Total. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: Internal standard responses were outside of acceptance limits for the following sample: WC-S. TRACK-DEEP-02 (6-8') (240-182202-2). The sample shows evidence of matrix interference.

Method 8260D: Internal standard (ISTD) response for the following samples were outside control limits: WC-SB2655-SOIL + DEBRIS (240-182202-15) and WC-SB2455-SOIL + DEBRIS (240-182202-16). The samples were re-extracted and/or re-analyzed and ISTD response was outside control limits.

Method 8260D: A MS/MSD was prepared for batch 240-566108, but was analyzed in a different analytical batch: WC-S. TRACK-DEEP-04 (6-8') (240-182202-4).

Method 5035: These samples were taken off a shelf in the sample receiving refrigerator, if these plastic bags were opened in another part of the lab they could have been contaminated: WC-SB2418-ABSORBENTS (240-182202-18), WC-SB1833-ABSORBENTS (240-182202-19), WC-SB2446-ABSORBENTS (240-182202-20), WC-SB1450-ABSORBENTS (240-182202-21), WC-SB1905-ABSORBENTS (240-182202-22), (240-182202-B-22 MS) and (240-182202-B-22 MSD).

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-566725 was outside the method criteria for the

Case Narrative

Job ID: 240-182202-1

Job ID: 240-182202-1 (Continued)

Laboratory: Eurofins Canton (Continued)

following analytes: Methyl tert-butyl ether and Chloromethane. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes are considered estimated.

Method 8260D: A MS/MSD was prepared for batch 240-566719, but it was analyzed in a different analytical batch: WC-SB2418-ABSORBENTS (240-182202-18), WC-SB1833-ABSORBENTS (240-182202-19) and WC-SB2446-ABSORBENTS (240-182202-20).

Method 8260D: The following samples were diluted due to the nature of the sample matrix: WC-SB2418-ABSORBENTS (240-182202-18), WC-SB1833-ABSORBENTS (240-182202-19) and WC-SB2446-ABSORBENTS (240-182202-20). Elevated reporting limits (RLs) are provided.

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566934 recovered above the upper control limit for: Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270E: The laboratory control sample (LCS) associated with samples WC-S. TRACK-DEEP-COMP (01-05) (240-182202-11), WC-S. TRACK-DEEP-COMP (06-10) (240-182202-12), WC-COMP-SOIL + DEBRIS (240-182202-17) and (240-182136-D-1-F) had an acid surrogate recovery above acceptance criteria. Because the associated samples were ND for all analytes no corrective action was necessary. The results have been flagged accordingly and reported.

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-566576 recovered above the upper control limit for 2-Nitrophenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-S. TRACK-DEEP-01 (8-10') (240-182202-1), WC-S. TRACK-DEEP-02 (6-8') (240-182202-2), WC-S. TRACK-DEEP-03 (8-10') (240-182202-3), WC-S. TRACK-DEEP-04 (6-8') (240-182202-4), WC-S. TRACK-DEEP-05 (4-6') (240-182202-5), WC-S. TRACK-DEEP-06 (4-6') (240-182202-6), WC-S. TRACK-DEEP-07 (4-6') (240-182202-7), WC-S. TRACK-DEEP-08 (2-4') (240-182202-8), WC-S. TRACK-DEEP-09 (2-4') (240-182202-9), WC-S. TRACK-DEEP-10 (4-6') (240-182202-10), WC-SB1188-SOIL + DEBRIS (240-182202-13), WC-AMU112-SOIL + DEBRIS (240-182202-14), WC-SB2655-SOIL + DEBRIS (240-182202-15), WC-SB2455-SOIL + DEBRIS (240-182202-16), WC-SB2418-ABSORBENTS (240-182202-18), WC-SB1833-ABSORBENTS (240-182202-19), WC-SB2446-ABSORBENTS (240-182202-20), WC-SB1450-ABSORBENTS (240-182202-21) and WC-SB1905-ABSORBENTS (240-182202-22).

Method 8270E: The following samples were diluted due to the nature of the sample matrix: WC-S. TRACK-DEEP-06 (4-6') (240-182202-6), WC-SB1450-ABSORBENTS (240-182202-21) and WC-SB1905-ABSORBENTS (240-182202-22). Elevated reporting limits (RLs) are provided.

Method 8270E: The following samples were diluted to bring the concentration of target analytes within the calibration range: WC-S. TRACK-DEEP-02 (6-8') (240-182202-2), WC-S. TRACK-DEEP-03 (8-10') (240-182202-3), WC-S. TRACK-DEEP-04 (6-8') (240-182202-4), WC-S. TRACK-DEEP-05 (4-6') (240-182202-5), WC-S. TRACK-DEEP-09 (2-4') (240-182202-9), WC-AMU112-SOIL + DEBRIS (240-182202-14), WC-SB2655-SOIL + DEBRIS (240-182202-15), (240-182202-F-1-B MS) and (240-182202-F-1-C MSD). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

Method 8082A: The following samples required a tetrabutylammonium sulfite (TBA) clean-up to reduce matrix interferences caused by sulfur: WC-S. TRACK-DEEP-COMP (01-05) (240-182202-11), WC-S. TRACK-DEEP-COMP (06-10) (240-182202-12) and WC-COMP-SOIL + DEBRIS (240-182202-17).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin

2. Were tamper/custody seals on the outside of the cooler(s)? If Yes Quantity lea Yes No
-Were the seals on the outside of the cooler(s) signed & dated? Yes No NA
-Were tamper/custody seals on the bottle(s) or bottle kits (LLHg/MeHg)? Yes No NA
-Were tamper/custody seals intact and uncompromised? Yes No NA

3. Shippers' packing slip attached to the cooler(s)? Yes No
4. Did custody papers accompany the sample(s)? Yes No
5. Were the custody papers relinquished & signed in the appropriate place? Yes No
6. Was/were the person(s) who collected the samples clearly identified on the COC? Yes No
7. Did all bottles arrive in good condition (Unbroken)? Yes No
8. Could all bottle labels (ID/Date/Time) be reconciled with the COC? Yes No
9. For each sample, does the COC specify preservatives (Y/N), # of containers (Y/N), and sample type of grab/comp (Y/N)? Yes No
10. Were correct bottle(s) used for the test(s) indicated? Yes No
11. Sufficient quantity received to perform indicated analyses? Yes No
12. Are these work share samples and all listed on the COC? Yes No
If yes, Questions 13-17 have been checked at the originating laboratory.

13. Were all preserved sample(s) at the correct pH upon receipt? Yes No NA pH Strip Lot# HC293086
14. Were VOAs on the COC? Yes No NA
15. Were air bubbles >6 mm in any VOA vials? Yes No NA  ← Larger than this.
16. Was a VOA trip blank present in the cooler(s)? Trip Blank Lot # _____ Yes No NA
17. Was a LL Hg or Me Hg trip blank present? _____ Yes No

Question	Answer	Comment
The cooler's custody seal is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace $>6\text{mm}$ in diameter (none, if from WV)?	N/A

ANALYTICAL REPORT

PREPARED FOR

Attn: Norfolk Southern
Norfolk Southern Corporation
650 W Peachtree St NW
Atlanta, Georgia 30308

Generated 3/31/2023 7:30:10 AM

JOB DESCRIPTION

NS East Palestine

JOB NUMBER

240-182202-1

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
*3	ISTD response or retention time outside acceptable limits.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC/MS Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Dioxin

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
I	Value is EMPC (estimated maximum possible concentration).
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
^+	Continuing Calibration Verification (CCV) is outside acceptance limits, high biased.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit

Job Narrative 240-182202-1

Comments

No additional comments.

Receipt

The samples were received on 3/18/2023 6:42 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 4 coolers at receipt time were 2.5° C, 3.7° C, 4.3° C and 4.3° C.

All soil samples collected in TerraCore kits were frozen within 48hours of collection.

GC/MS VOA

Method 5035: The following samples were received in pre-weighed containers with a label that was added in the field, which would cause a slight low bias in the final results: WC-S. TRACK-DEEP-01 (8-10') (240-182202-1), WC-S. TRACK-DEEP-02 (6-8') (240-182202-2), WC-S. TRACK-DEEP-03 (8-10') (240-182202-3), WC-S. TRACK-DEEP-04 (6-8') (240-182202-4), WC-S. TRACK-DEEP-05 (4-6') (240-182202-5), WC-S. TRACK-DEEP-06 (4-6') (240-182202-6), WC-S. TRACK-DEEP-07 (4-6') (240-182202-7), WC-S. TRACK-DEEP-08 (2-4') (240-182202-8), WC-S. TRACK-DEEP-09 (2-4') (240-182202-9), WC-S. TRACK-DEEP-10 (4-6') (240-182202-10), WC-SB1188-SOIL + DEBRIS (240-182202-13), WC-AMU112-SOIL + DEBRIS (240-182202-14), WC-SB2655-SOIL + DEBRIS (240-182202-15) and WC-SB2455-SOIL + DEBRIS (240-182202-16).

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566249 recovered above the upper control limit for Dichlorodifluoromethane. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.

Method 8260D: Surrogate recovery for the following samples was outside control limits: WC-S. TRACK-DEEP-05 (4-6') (240-182202-5) and WC-SB1188-SOIL + DEBRIS (240-182202-13). Re-extraction and/or re-analysis was performed and surrogate recovery was outside control limits.

Method 8260D: The MS/MSD for Prep Batch 240-566108 is not reported because the parent sample is reported as a low level soil sample.

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566133 recovered above the upper control limit for: 1,1,2-Trichloro-1,2,2-trifluoroethane and Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260D: The laboratory control sample (LCS) for preparation batch 240-566125 and analytical batch 240-566133 recovered outside control limits for the following analytes: 1,1,2-Trichloroethane, Toluene and Xylenes, Total. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: Internal standard responses were outside of acceptance limits for the following sample: WC-S. TRACK-DEEP-02 (6-8') (240-182202-2). The sample shows evidence of matrix interference.

Method 8260D: Internal standard (ISTD) response for the following samples were outside control limits: WC-SB2655-SOIL + DEBRIS (240-182202-15) and WC-SB2455-SOIL + DEBRIS (240-182202-16). The samples were re-extracted and/or re-analyzed and ISTD response was outside control limits.

Method 8260D: A MS/MSD was prepared for batch 240-566108, but was analyzed in a different analytical batch: WC-S. TRACK-DEEP-04 (6-8') (240-182202-4).

Method 5035: These samples were taken off a shelf in the sample receiving refrigerator, if these plastic bags were opened in another part of the lab they could have been contaminated: WC-SB2418-ABSORBENTS (240-182202-18), WC-SB1833-ABSORBENTS (240-182202-19), WC-SB2446-ABSORBENTS (240-182202-20), WC-SB1450-ABSORBENTS (240-182202-21), WC-SB1905-ABSORBENTS (240-182202-22), (240-182202-B-22 MS) and (240-182202-B-22 MSD).

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-566725 was outside the method criteria for the

Case Narrative

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182202-1

Job ID: 240-182202-1 (Continued)

Laboratory: Eurofins Canton (Continued)

following analytes: Methyl tert-butyl ether and Chloromethane. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes are considered estimated.

Method 8260D: A MS/MSD was prepared for batch 240-566719, but it was analyzed in a different analytical batch: WC-SB2418-ABSORBENTS (240-182202-18), WC-SB1833-ABSORBENTS (240-182202-19) and WC-SB2446-ABSORBENTS (240-182202-20).

Method 8260D: The following samples were diluted due to the nature of the sample matrix: WC-SB2418-ABSORBENTS (240-182202-18), WC-SB1833-ABSORBENTS (240-182202-19) and WC-SB2446-ABSORBENTS (240-182202-20). Elevated reporting limits (RLs) are provided.

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566934 recovered above the upper control limit for: Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270E: The laboratory control sample (LCS) associated with samples WC-S. TRACK-DEEP-COMP (01-05) (240-182202-11), WC-S. TRACK-DEEP-COMP (06-10) (240-182202-12), WC-COMP-SOIL + DEBRIS (240-182202-17) and (240-182136-D-1-F) had an acid surrogate recovery above acceptance criteria. Because the associated samples were ND for all analytes no corrective action was necessary. The results have been flagged accordingly and reported.

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-566576 recovered above the upper control limit for 2-Nitrophenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-S. TRACK-DEEP-01 (8-10') (240-182202-1), WC-S. TRACK-DEEP-02 (6-8') (240-182202-2), WC-S. TRACK-DEEP-03 (8-10') (240-182202-3), WC-S. TRACK-DEEP-04 (6-8') (240-182202-4), WC-S. TRACK-DEEP-05 (4-6') (240-182202-5), WC-S. TRACK-DEEP-06 (4-6') (240-182202-6), WC-S. TRACK-DEEP-07 (4-6') (240-182202-7), WC-S. TRACK-DEEP-08 (2-4') (240-182202-8), WC-S. TRACK-DEEP-09 (2-4') (240-182202-9), WC-S. TRACK-DEEP-10 (4-6') (240-182202-10), WC-SB1188-SOIL + DEBRIS (240-182202-13), WC-AMU112-SOIL + DEBRIS (240-182202-14), WC-SB2655-SOIL + DEBRIS (240-182202-15), WC-SB2455-SOIL + DEBRIS (240-182202-16), WC-SB2418-ABSORBENTS (240-182202-18), WC-SB1833-ABSORBENTS (240-182202-19), WC-SB2446-ABSORBENTS (240-182202-20), WC-SB1450-ABSORBENTS (240-182202-21) and WC-SB1905-ABSORBENTS (240-182202-22).

Method 8270E: The following samples were diluted due to the nature of the sample matrix: WC-S. TRACK-DEEP-06 (4-6') (240-182202-6), WC-SB1450-ABSORBENTS (240-182202-21) and WC-SB1905-ABSORBENTS (240-182202-22). Elevated reporting limits (RLs) are provided.

Method 8270E: The following samples were diluted to bring the concentration of target analytes within the calibration range: WC-S. TRACK-DEEP-02 (6-8') (240-182202-2), WC-S. TRACK-DEEP-03 (8-10') (240-182202-3), WC-S. TRACK-DEEP-04 (6-8') (240-182202-4), WC-S. TRACK-DEEP-05 (4-6') (240-182202-5), WC-S. TRACK-DEEP-09 (2-4') (240-182202-9), WC-AMU112-SOIL + DEBRIS (240-182202-14), WC-SB2655-SOIL + DEBRIS (240-182202-15), (240-182202-F-1-B MS) and (240-182202-F-1-C MSD). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

Method 8082A: The following samples required a tetrabutylammonium sulfite (TBA) clean-up to reduce matrix interferences caused by sulfur: WC-S. TRACK-DEEP-COMP (01-05) (240-182202-11), WC-S. TRACK-DEEP-COMP (06-10) (240-182202-12) and WC-COMP-SOIL + DEBRIS (240-182202-17).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin

Case Narrative

Client: Norfolk Southern Corporation

Job ID: 240-182202-1

Job ID: 240-182202-1 (Continued)

Laboratory: Eurofins Canton (Continued)

Method 8290A: Any peak area that is the result of interferences from poly-chlorinated diphenyl ethers observed in the sample has been removed from the calculated results prior to reporting the data for totals.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

Method 6010D: The continuing calibration verification (CCV) associated with batch 240-566447 recovered above the upper control limit for silver and chromium. The samples associated with this CCV were below the reporting limit for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-S. TRACK-DEEP-01 (8-10') (240-182202-1), WC-S. TRACK-DEEP-02 (6-8') (240-182202-2), WC-S. TRACK-DEEP-03 (8-10') (240-182202-3), WC-S. TRACK-DEEP-04 (6-8') (240-182202-4), WC-S. TRACK-DEEP-05 (4-6') (240-182202-5), WC-S. TRACK-DEEP-06 (4-6') (240-182202-6), WC-S. TRACK-DEEP-07 (4-6') (240-182202-7), WC-S. TRACK-DEEP-08 (2-4') (240-182202-8), WC-S. TRACK-DEEP-09 (2-4') (240-182202-9), WC-S. TRACK-DEEP-10 (4-6') (240-182202-10), WC-SB1188-SOIL + DEBRIS (240-182202-13), WC-AMU112-SOIL + DEBRIS (240-182202-14), WC-SB2655-SOIL + DEBRIS (240-182202-15), WC-SB2455-SOIL + DEBRIS (240-182202-16), WC-SB1833-ABSORBENTS (240-182202-19), WC-SB2446-ABSORBENTS (240-182202-20), WC-SB1450-ABSORBENTS (240-182202-21) and WC-SB1905-ABSORBENTS (240-182202-22).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
The cooler's custody seal is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace $>6\text{mm}$ in diameter (none, if from WV)?	N/A

JOB DESCRIPTION

NS East Palestine

JOB NUMBER

240-182548-1

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
B	Compound was found in the blank and sample.
E	Result exceeded calibration range.
H	Sample was prepped or analyzed beyond the specified holding time
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC/MS Semi VOA

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
F1	MS and/or MSD recovery exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Dioxin

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
I	Value is EMPC (estimated maximum possible concentration).
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent

Job Narrative 240-182548-1

Comments

No additional comments.

Receipt

The samples were received on 3/25/2023 6:35 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 1.3° C, 2.2° C and 2.7° C.

GC/MS VOA

Method 5035: The following sample(s) were received in pre-weighed containers with a label that was added in the field, which would cause a slight low bias in the final results. WC-S. TRACK-SP2-01 (2-3') (240-182548-1), WC-S. TRACK-SP2-02 (2-3') (240-182548-2), WC-S. TRACK-SP2-03 (4-5') (240-182548-3), WC-S. TRACK-SP2-04 (4-5') (240-182548-4), WC-S. TRACK-SP2-05 (6-7') (240-182548-5), WC-S. TRACK-SP2-06 (2-3') (240-182548-6), WC-S. TRACK-SP2-07 (3-4') (240-182548-7), WC-S. TRACK-SP2-08 (7-8') (240-182548-8), WC-S. TRACK-SP2-09 (9-10') (240-182548-9), WC-S. TRACK-SP2-10 (5-6') (240-182548-10), (240-182548-A-10 MS) and (240-182548-A-10 MSD).

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-566934 recovered above the upper control limit for: Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-567081 recovered above the upper control limit for 1,1,2,2-Tetrachloroethane, Bromomethane, Chloroethane, Dichlorodifluoromethane and Vinyl chloride. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260D: The laboratory control sample (LCS) for preparation batch 240-567049 and 240-566928 and analytical batch 240-567081 recovered outside control limits for the following analyte: Acetone. Acetone has been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed.

Method 8260D: The method blank for preparation batch 240-567049 and 240-566928 and analytical batch 240-567081 contained Acetone above the reporting limit (RL). This compound is considered a common laboratory contaminant. The associated samples were not re-extracted and/or re-analyzed because the concentration of the common lab contaminant in the method blank was less than 5 times the RL.

Method 8260D: Surrogate recovery for the following sample was outside of acceptance limits: WC-S. TRACK-SP2-01 (2-3') (240-182548-1). There was insufficient sample to perform a re-extraction; therefore, the data have been reported.

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-567084 was outside the method criteria for the following analytes: 1,2-Dibromo-3-Chloropropane and Dichloro-difluoromethane. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes are considered estimated.

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-567049 and analytical batch 240-567084.

Method 8260D: The laboratory control sample (LCS) for preparation batch 240-567049 and analytical batch 240-567084 recovered outside control limits for the following analyte: Acetone. These analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The following sample was preserved via freezing on 3-26-23 at 12:51: WC-S. TRACK-SP2-01 (2-3') (240-182548-1), WC-S. TRACK-SP2-02 (2-3') (240-182548-2) and WC-S. TRACK-SP2-05 (6-7') (240-182548-5). This is outside the 48 hour time frame required by the method.

Method 8260D: The method blank for 240-567049 contained Acetone above the reporting limit (RL). This compound is considered a

Case Narrative

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182548-1

Job ID: 240-182548-1 (Continued)

Laboratory: Eurofins Canton (Continued)

common laboratory contaminant. The associated sample was not re-extracted and/or re-analyzed because the concentration of the common lab contaminant in the method blank was less than 5 times the RL.

Method 8260D: A MS/MSD was prepared for batch 240-566928, but was analyzed in a different analytical batch: WC-S. TRACK-SP2-03 (4-5') (240-182548-3) and WC-S. TRACK-SP2-09 (9-10') (240-182548-9).

Method 8260D: This sample had a reanalysis that had different results than the original analysis. This is most likely due to non-homogeneity in the sample. Both runs are reported: WC-S. TRACK-SP2-09 (9-10') (240-182548-9)

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-567279 was outside the method criteria for the following analytes: 1,2-Dibromo-3-Chloropropane; 1,2-Dichloropropane; Chloromethane; Methyl tert-butyl ether; and trans-1,3-Dichloropropene. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes are considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270E: The following samples were diluted to bring the concentration of target analytes within the calibration range: WC-S. TRACK-SP2-01 (2-3') (240-182548-1), WC-S. TRACK-SP2-02 (2-3') (240-182548-2), WC-S. TRACK-SP2-03 (4-5') (240-182548-3), WC-S. TRACK-SP2-04 (4-5') (240-182548-4), WC-S. TRACK-SP2-05 (6-7') (240-182548-5), WC-S. TRACK-SP2-06 (2-3') (240-182548-6), WC-S. TRACK-SP2-07 (3-4') (240-182548-7), WC-S. TRACK-SP2-08 (7-8') (240-182548-8), WC-S. TRACK-SP2-09 (9-10') (240-182548-9), WC-S. TRACK-SP2-10 (5-6') (240-182548-10), (240-182548-G-10-C MS) and (240-182548-G-10-D MSD). Elevated reporting limits (RLs) are provided.

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-567268 recovered above the upper control limit for 2-Nitrophenol. The samples associated with this CCV were non-detect for the affected analyte; therefore, the data have been reported. The following samples are impacted: WC-S. TRACK-SP2-01 (2-3') (240-182548-1), WC-S. TRACK-SP2-02 (2-3') (240-182548-2), WC-S. TRACK-SP2-03 (4-5') (240-182548-3), WC-S. TRACK-SP2-04 (4-5') (240-182548-4), WC-S. TRACK-SP2-05 (6-7') (240-182548-5), WC-S. TRACK-SP2-06 (2-3') (240-182548-6), WC-S. TRACK-SP2-07 (3-4') (240-182548-7), WC-S. TRACK-SP2-08 (7-8') (240-182548-8), WC-S. TRACK-SP2-09 (9-10') (240-182548-9) and WC-S. TRACK-SP2-10 (5-6') (240-182548-10).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

Method 8082A: The following samples required a tetrabutylammonium sulfite (TBA) clean-up to reduce matrix interferences caused by sulfur: WC-S. TRACK-SP2-COMP01-05 (240-182548-11) and WC-S. TRACK-SP2-COMP06-10 (240-182548-12).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin

Method 8290A: Any peak area that is the result of interferences from poly-chlorinated diphenyl ethers observed in the sample has been removed from the calculated results prior to reporting the data for totals.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Case Narrative

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182548-1

Job ID: 240-182548-1 (Continued)

Laboratory: Eurofins Canton (Continued)

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
The cooler's custody seal is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?	N/A

JOB DESCRIPTION

NS East Palestine

JOB NUMBER

240-182577-1

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Job ID: 240-182577-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
H	Sample was prepped or analyzed beyond the specified holding time
H3	Sample was received and analyzed past holding time.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
⌘	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Narrative

Job Narrative 240-182577-1

Comments

No additional comments.

Receipt

The samples were received on 3/27/2023 6:30 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 0.8° C.

GC/MS VOA

Method 5035: The following sample was received in pre-weighed containers with a label that was added in the field, which would cause a slight low bias in the final results: WC-S. TRACK-SP2E-01 (2-3') (240-182577-1).

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-567084 was outside the method criteria for the following analytes: 1,2-Dibromo-3-Chloropropane and Dichloro-difluoromethane. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes are considered estimated.

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-567049 and analytical batch 240-567084.

Method 8260D: The laboratory control sample (LCS) for preparation batch 240-567049 and analytical batch 240-567084 recovered outside control limits for the following analyte: Acetone. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The following sample was preserved via freezing on 3-27-22 at 20:20pm: WC-S. TRACK-SP2E-01 (2-3') (240-182577-1). This is outside the 48 hour time frame required by the method.

Method 8260D: The method blank for 240-567049 contained Acetone above the reporting limit (RL). This compound is considered a common laboratory contaminant. The associated sample was not re-extracted and/or re-analyzed because the concentration of the common lab contaminant in the method blank was less than 5 times the RL.

Method 8260D: The following sample was received with insufficient time remaining to freeze within 48 hours, as required for samples collected in water preserved TerraCores: WC-S. TRACK-SP2E-01 (2-3') (240-182577-1). The sample was collected on 3/25/2023 at 4:10 PM. The sample was received on 3/27/2023 at 6:30 PM and placed in the freezer on 3/27/2023 at 8:20 PM.

Method 8260D: Surrogate recovery for the following sample was outside the upper control limit: WC-S. TRACK-SP2E-01 (2-3') (240-182577-1). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-567268 recovered above the upper control limit for 2-Nitrophenol. The samples associated with this CCV were non-detect for the affected analyte; therefore, the data have been reported. The following sample is impacted: WC-S. TRACK-SP2E-01 (2-3') (240-182577-1).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Case Narrative

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182577-1

Job ID: 240-182577-1 (Continued)

Laboratory: Eurofins Canton (Continued)

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

ANALYTICAL REPORT

PREPARED FOR

Attn: Daniel Hunt
Norfolk Southern Corporation
650 Peachtree Street, NW
Atlanta, Georgia 30308

Generated 3/7/2023 8:37:12 PM

JOB DESCRIPTION

NS-ER East Palestine, OH

JOB NUMBER

410-117699-1

Job Notes

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Authorization

Generated
3/7/2023 8:37:12 PM

Authorized for release by
Kelly Bauer, Project Manager
Kelly.Bauer@et.eurofinsus.com
(717)556-7262

Compliance Statement

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- QC results that exceed the upper limits and are associated with non-detect samples are qualified but further narration is not required since the bias is high and does not change a non-detect result. Further narration is also not required with QC blank detection when the associated sample concentration is non-detect or more than ten times the level in the blank.
- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD is performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. The foregoing express warranty is exclusive and is given in lieu of all other warranties, expressed or implied, except as otherwise agreed. We disclaim any other warranties, expressed or implied, including a warranty of fitness for particular purpose and warranty of merchantability. In no event shall Eurofins Lancaster Laboratories Environmental, LLC be liable for indirect, special, consequential, or incidental damages including, but not limited to, damages for loss of profit or goodwill regardless of (A) the negligence (either sole or concurrent) of Eurofins Lancaster Laboratories Environmental and (B) whether Eurofins Lancaster Laboratories Environmental has been informed of the possibility of such damages. We accept no legal responsibility for the purposes for which the client uses the test results. Except as otherwise agreed, no purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Detection Summary

Client: Norfolk Southern Corporation
Project/Site: NS-ER East Palestine, OH

Job ID: 410-117699-1

Client Sample ID: WC-251079 (Continued)

Lab Sample ID: 410-117699-7

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
n-Butyl acrylate - DL	5600		250		ug/L	50		8260D	Total/NA

Client Sample ID: WC-251782

Lab Sample ID: 410-117699-8

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
n-Butyl acrylate - DL	1200		50		ug/L	10		8260D	Total/NA

Client Sample ID: WC-538B

Lab Sample ID: 410-117699-9

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
n-Butyl acrylate - DL	49000		1000		ug/L	200		8260D	Total/NA

Client Sample ID: TRIP BLANK

Lab Sample ID: 410-117699-10

No Detections.

This Detection Summary does not include radiochemical test results.

Question	Answer	Comment
The cooler's custody seal is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	True	
Sample custody seals are intact.	True	
VOA sample vials do not have headspace $>6\text{mm}$ in diameter (none, if from WV)?	True	

 **ANALYTICAL REPORT****PREPARED FOR**

Attn: Carolyn Grogan
ARCADIS U.S., Inc.
7575 Huntington Park Drive
Suite 130
Columbus, Ohio 43235

JOB DESCRIPTION

NS East Palestine

JOB NUMBER

240-180173-1

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Job ID: 240-180173-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
F1	MS and/or MSD recovery exceeds control limits.
F2	MS/MSD RPD exceeds control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC/MS Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
S1-	Surrogate recovery exceeds control limits, low biased.

GC Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
F3	Duplicate RPD exceeds the control limit
HF	Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Narrative

Job Narrative 240-180173-1

Comments

No additional comments.

Receipt

The samples were received on 2/10/2023 7:00 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 4 coolers at receipt time were 1.2° C, 1.2° C, 2.5° C and 3.8° C.

GC/MS VOA

Method 8260D: Surrogate recovery for the following sample was outside control limits: WC-01/2023-02-09/ (240-180173-1). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-561656 was outside the method criteria for the following analyte: Dichlorodifluoromethane. An MRL standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-561615 was outside the method criteria for the following analytes: Bromomethane, Chloromethane and Dichlorodifluoromethane. An MRL standard at or below the reporting limit (RL) was analyzed with the affected samples: TRIP BLANK (240-180173-6), (CCV 240-561615/4), (CCV 240-561615/5), (CCVIS 240-561615/3), (LCS 240-561615/11), (LCS 240-561615/6), (LCS 240-561615/7) and (MB 240-561615/9) and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes is considered estimated.

Method 8260D: The following sample was collected in a properly preserved vial; however, the pH was outside the required criteria when verified by the laboratory. The sample was analyzed within the 7-day holding time specified for unpreserved samples: WC-01/2023-02-09/ (240-180173-1).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270E: The following samples were diluted due to the nature of the sample matrix: WC-01/2023-02-09/ (240-180173-1), WC-02/2023-02-09/ (240-180173-2), WC-03/2023-02-09/ (240-180173-3), WC-04/2023-02-09/ (240-180173-4) and WC-05/2023-02-09/ (240-180173-5). Elevated reporting limits (RLs) are provided.

Method 8270E: The RL's for Benzaldehyde and Hexachlorobenzene are below the low point of the calibration. The RL's are supported by the MDL: WC-01/2023-02-09/ (240-180173-1), WC-02/2023-02-09/ (240-180173-2), WC-03/2023-02-09/ (240-180173-3), WC-04/2023-02-09/ (240-180173-4) and WC-05/2023-02-09/ (240-180173-5).

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-561702 recovered above the upper control limit for 3-Nitroaniline, 4-Nitrophenol, Benzaldehyde, Bis(2-chloroethyl)ether, and N-Nitrosodi-n-propylamine. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-01/2023-02-09/ (240-180173-1), WC-02/2023-02-09/ (240-180173-2), WC-03/2023-02-09/ (240-180173-3), WC-04/2023-02-09/ (240-180173-4) and WC-05/2023-02-09/ (240-180173-5).

Method 8270E: The laboratory control sample (LCS) for preparation batch 240-561604 and analytical batch 240-561702 recovered outside control limits for the following analytes: Benzaldehyde and 4-Nitroaniline. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

Method 8015D: The following samples were diluted to bring the concentration of target analytes within the calibration range: WC-01/2023-02-09/ (240-180173-1), WC-02/2023-02-09/ (240-180173-2) and WC-03/2023-02-09/ (240-180173-3). Elevated reporting

Case Narrative

Client: ARCADIS U.S., Inc.
Project/Site: NS East Palestine

Job ID: 240-180173-1

Job ID: 240-180173-1 (Continued)

Laboratory: Eurofins Canton (Continued)

limits (RLs) are provided.

Method 8015D: The following sample required a dilution due to an abundance of target analyte: WC-01/2023-02-09/ (240-180173-1). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8015D: The following sample was diluted to bring the concentration of target analytes within the calibration range: WC-04/2023-02-09/ (240-180173-4). Elevated reporting limits (RLs) are provided.

Method 8015D: The following sample required a dilution due to the nature of the sample matrix: WC-04/2023-02-09/ (240-180173-4). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry

Method SM 2540D: The sample duplicate (DUP) precision for analytical batch 240-561611 was outside control limits. Sample non-homogeneity is suspected.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep

Method 3511: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-561603.

Method 3511: Due to the matrix, the following samples could not be concentrated to the final method required volume: WC-01/2023-02-09/ (240-180173-1) and WC-04/2023-02-09/ (240-180173-4). The reporting limits (RLs) are elevated proportionately.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Method Summary

Client: ARCADIS U.S., Inc.

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Definitions/Glossary

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-180852-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Comments

No additional comments.

Receipt

The samples were received on 2/24/2023 1:19 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 2.6° C.

GC/MS VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270E: The RL's for Benzaldehyde and Hexachlorobenzene are below the low point of the calibration. The RL's are supported by the MDL.

WC-257225-PLEASANT (240-180852-1), WC-251068-BLUE BLDG EAST (240-180852-2) and WC-257516- GAS STATION (240-180852-3)

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-563439 recovered above the upper control limit for Atrazine. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-257225-PLEASANT (240-180852-1), WC-251068-BLUE BLDG EAST (240-180852-2) and WC-257516- GAS STATION (240-180852-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

Method 3510C: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-563384 and 240-563384.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Method Summary

- 2. Were tamper/custody seals on the outside of the cooler(s)? If Yes Quantity 1 Yes No
 -Were the seals on the outside of the cooler(s) signed & dated? Yes No NA
 -Were tamper/custody seals on the bottle(s) or bottle kits (LLHg/MeHg)? Yes No
 -Were tamper/custody seals intact and uncompromised? Yes No NA
- 3. Shippers' packing slip attached to the cooler(s)? Yes No
- 4. Did custody papers accompany the sample(s)? Yes No
- 5. Were the custody papers relinquished & signed in the appropriate place? Yes No
- 6. Was/were the person(s) who collected the samples clearly identified on the COC? Yes No
- 7. Did all bottles arrive in good condition (Unbroken)? Yes No
- 8. Could all bottle labels (ID/Date/Time) be reconciled with the COC? Yes No
- 9. For each sample, does the COC specify preservatives (Y/N), # of containers (Y/N), and sample type of grab/comp (Y/N)? Yes No
- 10. Were correct bottle(s) used for the test(s) indicated? Yes No
- 11. Sufficient quantity received to perform indicated analyses? Yes No
- 12. Are these work share samples and all listed on the COC? Yes No
- If yes, Questions 13-17 have been checked at the originating laboratory.
- 13. Were all preserved sample(s) at the correct pH upon receipt? Yes No NA pH Strip Lot# HC203864
- 14. Were VOAs on the COC? Yes No
- 15. Were air bubbles >6 mm in any VOA vials? Yes No NA ← Larger than this.
- 16. Was a VOA trip blank present in the cooler(s)? Trip Blank Lot # Covered Yes No
- 17. Was a LL Hg or Me Hg trip blank present? Yes No

Tests that are not checked for pH by Receiving:
 VOAs
 Oil and Grease
 TOC

Contacted PM _____ Date _____ by _____ via Verbal Voice Mail Other _____
 Concerning _____

18. CHAIN OF CUSTODY & SAMPLE DISCREPANCIES additional next page Samples processed by: _____
There is no 1L plastic for TSS, no 250mL plastic for pH, no 60mL vials for DBO micro extraction. Date 2-24-23
Also there is no preserved volume for TOC.

19. SAMPLE CONDITION
 Sample(s) _____ were received after the recommended holding time had expired.
 Sample(s) _____ were received in a broken container.
 Sample(s) 1x 40 mL for Blue Bldg were received with bubble >6 mm in diameter. (Notify PM)

20. SAMPLE PRESERVATION
 Sample(s) _____ were further preserved in the laboratory.
 Time preserved: _____ Preservative(s) added/Lot number(s): _____
 VOA Sample Preservation - Date/Time VOAs Frozen: _____

JOB NUMBER

240-181183-1

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.

GC Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1-	Surrogate recovery exceeds control limits, low biased.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
HF	Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

Job Narrative 240-181183-1

Receipt

The samples were received on 3/1/2023 8:00 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 0.1°C, 0.2°C and 0.2°C

GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-564039 recovered above the upper control limit for Bromomethane and Dichloro-difluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC - 251060 - BLUE BLDG EAST (240-181183-2), WC - 251633 - PLEASANT (240-181183-4), WC - 251478 - GAS STATION (240-181183-5), TB - 01 (240-181183-6), TB - 02 (240-181183-7), TB - 03 (240-181183-8), (CCV 240-564039/4), (CCVIS 240-564039/3), (LCS 240-564039/5), (LCS 240-564039/6), (MB 240-564039/8), (240-180978-B-5), (240-180978-D-5 MS) and (240-180978-G-5 MSD).

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-564153 recovered above the upper control limit for Bromomethane and Dichloro-difluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC - 257204 - BLUE BLDG WEST (240-181183-1), WC - 251060 - BLUE BLDG EAST (240-181183-2), WC - 251079 - CLARK (240-181183-3), WC - 251478 - GAS STATION (240-181183-5), (CCV 240-564153/4), (CCVIS 240-564153/3), (LCS 240-564153/5), (LCS 240-564153/6), (MB 240-564153/8), (240-180978-L-5), (240-180978-A-5 MS) and (240-180978-I-5 MSD).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA

Method 8270E: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-563981.

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-564574 recovered outside acceptance criteria, low biased, for 2,4-Dinitrophenol. A reporting limit (RL) standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8270E: The RL for Hexachlorobenzene is below the low point of the calibration. The RL is supported by the MDL. WC - 257204 - BLUE BLDG WEST (240-181183-1), WC - 251060 - BLUE BLDG EAST (240-181183-2), WC - 251079 - CLARK (240-181183-3), WC - 251633 - PLEASANT (240-181183-4) and WC - 251478 - GAS STATION (240-181183-5)

Method 8270E: The initial calibration verification (ICV) %D result for batch 240-564574 was above the upper control limit. Sample results were non-detects, and have been reported as qualified data.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics

Method 8015D_DRO: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-564322.

Method 8015D_DRO: Surrogate recovery for the following sample was outside control limits: WC - 251079 - CLARK (240-181183-3). Re-extraction and re-analysis was performed confirming surrogate recovery outside control limits due to matrix interference.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
▫	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Narrative

Job Narrative 240-181523-1

Receipt

The samples were received on 3/8/2023 12:25 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.6°C

GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-564793 recovered above the upper control limit for Dichloro-difluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-251362 (240-181523-1), WC-537A (240-181523-2), WC-AL5679 (240-181523-3), WC-AL4944 (240-181523-4), WC-AL4216 (240-181523-5), WC-531A (240-181523-6), TRIP BLANK (240-181523-8), (CCV 240-564793/4), (CCVIS 240-564793/3), (LCS 240-564793/5), (LCS 240-564793/6), (MB 240-564793/8), (240-181229-B-11), (240-181229-B-11 MS) and (240-181229-B-11 MSD).

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-564959 recovered above the upper control limit for Dichloro-difluoromethane and Bromomethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-251362 (240-181523-1), WC-537A (240-181523-2), WC-AL5679 (240-181523-3), WC-AL4944 (240-181523-4), WC-AL4216 (240-181523-5), WC-531A (240-181523-6), (CCV 240-564959/4), (CCVIS 240-564959/3), (LCS 240-564959/5), (LCS 240-564959/6), (MB 240-564959/8), (240-181229-D-9), (240-181229-D-9 MS) and (240-181229-D-9 MSD).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Method Summary

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-181523-1

Method	Method Description	Protocol	Laboratory
8260D	Volatile Organic Compounds by GC/MS	SW846	EET CAN
8270E	Semivolatile Organic Compounds (GC/MS)	SW846	EET CAN
6010D	Metals (ICP)	SW846	EET CAN
7470A	Mercury (CVAA)	SW846	EET CAN

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Definitions/Glossary

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182044-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.

GC Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1-	Surrogate recovery exceeds control limits, low biased.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
HF	Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Eurofins Canton

Case Narrative

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182044-1

Job ID: 240-182044-1

Laboratory: Eurofins Canton

Narrative

Job Narrative 240-182044-1

Receipt

The sample was received on 3/16/2023 7:00 PM. Unless otherwise noted below, the sample arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.9°C

GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 240-565915 recovered above the upper control limit for Dichloro-Difluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-257761-STORM SEWER (240-182044-1), (CCV 240-565915/4), (CCVIS 240-565915/3), (LCS 240-565915/5), (LCS 240-565915/6) and (MB 240-565915/8).

Method 8260D: The method requirement for no headspace was not met. The following volatile sample was analyzed with headspace in the sample container: WC-257761-STORM SEWER (240-182044-1).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA

Method 8270E: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-565863.

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-565890 recovered above the upper control limit for 2-Methylphenol and Phenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is impacted: WC-257761-STORM SEWER (240-182044-1).

Method 8270E: The following sample was diluted to bring the concentration of target analytes within the calibration range: WC-257761-STORM SEWER (240-182044-1). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics

Method 8015D_DRO: The following sample required a dilution due to the nature of the sample matrix: WC-257761-STORM SEWER (240-182044-1). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Method Summary

Client: Norfolk Southern Corporation

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1-	Surrogate recovery exceeds control limits, low biased.

GC Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
HF	Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
▫	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)

Narrative

Job Narrative 240-182547-1

Receipt

The samples were received on 3/25/2023 6:35 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 1.6°C and 2.8°C

GC/MS VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA

Method 8270E: The following samples were diluted to bring the concentration of target analytes within the calibration range: WC-251633-WATER (240-182547-1), WC-AL4771-WATER (240-182547-2), WC-251060-WATER (240-182547-3), WC-251688-WATER (240-182547-4) and WC-251478-WATER (240-182547-5). Elevated reporting limits (RLs) are provided.

Method 8270E: The laboratory control sample (LCS) for preparation batch 240-566966 and analytical batch 240-567104 recovered outside control limits for 4-Chloroaniline. This analyte has been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified. The following samples were impacted: WC-251633-WATER (240-182547-1), WC-AL4771-WATER (240-182547-2), WC-251060-WATER (240-182547-3), WC-251688-WATER (240-182547-4) and WC-251478-WATER (240-182547-5).

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-567104 recovered above the upper control limit for 2-Nitrophenol and 2,6-Dinitrotoluene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: WC-251633-WATER (240-182547-1), WC-AL4771-WATER (240-182547-2), WC-251060-WATER (240-182547-3), WC-251688-WATER (240-182547-4) and WC-251478-WATER (240-182547-5).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics

Method 8015D_DRO: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-566977.

Method 8015D_DRO: The following sample was diluted due to the nature of the sample matrix: WC-251633-WATER (240-182547-1)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Method Summary

Client: Norfolk Southern Corporation
Project/Site: NS East Palestine

Job ID: 240-182547-1

Method	Method Description	Protocol	Laboratory
8260D	Volatile Organic Compounds by GC/MS	SW846	EET CAN
8270E	Semivolatile Organic Compounds (GC/MS)	SW846	EET CAN
8015D	Diesel Range Organics (DRO) (GC)	SW846	EET CAN
6010D	Metals (ICP)	SW846	EET CAN
7470A	Mercury (CVAA)	SW846	EET CAN
1010B	Ignitability, Pinsky-Martens Closed-Cup Method	SW846	EET CAN
2540D-2015	Total Suspended Solids (Dried at 103-105°C)	SM	EET CAN
5310 C-2014	Total Organic Carbon/Persulfate - Ultrav	SM	EET CAN
9040C	pH	SW846	EET CAN
1311	TCLP Extraction	SW846	EET CAN
3010A	Preparation, Total Metals	SW846	EET CAN
3510C	Liquid-Liquid Extraction (Separatory Funnel)	SW846	EET CAN
3511	Microextraction of Organic Compounds	SW846	EET CAN
5030C	Purge and Trap	SW846	EET CAN
7470A	Preparation, Mercury	SW846	EET CAN

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Narrative

Job Narrative 240-180173-2

Receipt

The samples were received on 2/10/2023 7:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 4 coolers at receipt time were 1.2°C, 1.2°C, 2.5°C and 3.8°C

PFAS

Method PFC_IDA: The sample injection standard peak areas in the following sample: WC-Composite-01 to 05 (240-180173-7) are outside of the QC limits for both the initial injection and the re-injection. The values here are from the initial injection of the sample.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

WASTE MATERIAL PROFILE SHEET

Clean Harbors Profile No. CH2580626

A. GENERAL INFORMATION

GENERATOR EPA ID #/REGISTRATION # **OHR000221457** GENERATOR NAME: **Norfolk Southern Railway**
 GENERATOR CODE (Assigned by Clean Harbors) **NO36008** CITY **East Palastine** STATE/PROVINCE **OH** ZIP/POSTAL CODE **44413**
 ADDRESS **MP PC49 RAILROAD TRACKS** PHONE: **(404) 273-4472**
 CUSTOMER CODE (Assigned by Clean Harbors) **NO36007** CUSTOMER NAME: **Norfolk Southern Railway**
 ADDRESS **650 West Peachtree Street Northwest** CITY **Atlanta** STATE/PROVINCE **GA** ZIP/POSTAL CODE **30308**

B. WASTE DESCRIPTION

WASTE DESCRIPTION: **Soil impacted w vinyl chloride (>10x UTS)**

PROCESS GENERATING WASTE: **remediation following train derailment. Chemicals released include unused commercial grade vinyl chloride.**

IS THIS WASTE CONTAINED IN SMALL PACKAGING CONTAINED WITHIN A LARGER SHIPPING CONTAINER? **No**

C. PHYSICAL PROPERTIES (at 25C or 77F)

PHYSICAL STATE	NUMBER OF PHASES/LAYERS				VISCOSITY (If liquid present)	COLOR
	1	2	3	TOP		
<input checked="" type="checkbox"/> SOLID WITHOUT FREE LIQUID				0.00	1 - 100 (e.g. Water)	brown, black, white
POWDER	% BY VOLUME (Approx.)			MIDDLE	101 - 500 (e.g. Motor Oil)	
MONOLITHIC SOLID				BOTTOM	501 - 10,000 (e.g. Molasses)	
LIQUID WITH NO SOLIDS					> 10,000	
LIQUID/SOLID MIXTURE						
% FREE LIQUID						
% SETTLED SOLID						
% TOTAL SUSPENDED SOLID						
SLUDGE						
GAS/AEROSOL

> 200 (>93)	>= 12.5	<input checked="" type="checkbox"/> > 1.2 (e.g. Methylene Chloride)	5.1 - 20.0		Actual:	

D. COMPOSITION (List the complete composition of the waste, include any inert components and/or debris. Ranges for individual components are acceptable. If a trade name is used, please supply an MSDS. Please do not use abbreviations.)

CHEMICAL	MIN	MAX	UOM
DEBRIS (POLY SHEETING, PPE, WOOD)	0.0000000	5.0000000	%
GRAVEL AND ROCKS (< 3 INCHES)	15.0000000	40.0000000	%
SOIL	60.0000000	85.0000000	%
VINYL CHLORIDE	0.0000000	85.0000000	PPM

DOES THIS WASTE CONTAIN ANY HEAVY GAUGE METAL DEBRIS OR OTHER LARGE OBJECTS (EX., METAL PLATE OR PIPING >1/4" THICK OR >12" LONG, METAL REINFORCED HOSE >12" LONG, METAL WIRE >12" LONG, METAL VALVES, PIPE FITTINGS, CONCRETE REINFORCING BAR OR PIECES OF CONCRETE >3")? YES NO

If yes, describe, including dimensions:

DOES THIS WASTE CONTAIN ANY METALS IN POWDERED OR OTHER FINELY DIVIDED FORM? YES NO

DOES THIS WASTE CONTAIN OR HAS IT CONTACTED ANY OF THE FOLLOWING; ANIMAL WASTES, HUMAN BLOOD, BLOOD PRODUCTS, BODY FLUIDS, MICROBIOLOGICAL WASTE, PATHOLOGICAL WASTE, HUMAN OR ANIMAL DERIVED SERUMS OR PROTEINS OR ANY OTHER POTENTIALLY INFECTIOUS MATERIAL? YES NO

I acknowledge that this waste material is neither infectious nor does it contain any organism known to be a threat to human health. This certification is based on my knowledge of the material. Select the answer below that applies:

The waste was never exposed to potentially infectious material. YES NO

Chemical disinfection or some other form of sterilization has been applied to the waste. YES NO

I ACKNOWLEDGE THAT THIS PROFILE MEETS THE CLEAN HARBORS BATTERY PACKAGING REQUIREMENTS. YES NO

I ACKNOWLEDGE THAT MY FRIABLE ASBESTOS WASTE IS DOUBLE BAGGED AND WETTED. YES NO

SPECIFY THE SOURCE CODE ASSOCIATED WITH THE WASTE. **G32** SPECIFY THE FORM CODE ASSOCIATED WITH THE WASTE. **W301**

E. CONSTITUENTS

Are these values based on testing or knowledge? Knowledge Testing

If constituent concentrations are based on analytical testing, analysis must be provided. Please attach document(s) using the link on the Submit tab.

Please indicate which constituents below apply. Concentrations must be entered when applicable to assist in accurate review and expedited approval of your waste profile. Please note that the total regulated metals and other constituents sections require answers.

RE: Generator ID Number : 224090
Wastestream : 224090-1
Waste Name : SOIL WITH VINYL CHLORIDE

Dear Dan Hunt:

In compliance with OAC 3745-54-12(B), we are notifying you that we are fully permitted to store and/or treat your waste. We will accept wastestream 224090-1 as reviewed and approved by Heritage Thermal Services, Inc. (HTS).

We at HTS look forward to the opportunity to serve you.

Sincerely,

A handwritten signature in black ink that reads "Christopher T. Pherson". The signature is written in a cursive, flowing style.

Christopher T. Pherson, President

22. CERTIFICATION: Sign and date the certification. I hereby certify that I am an authorized agent of the generator, and warrant on behalf of the generator, that all information submitted herein and attached documentation contains true, accurate and complete descriptions of this material. Any sample submitted for analysis or attached laboratory data is representative of the material being offered for approval. All relevant information regarding known or suspected hazards in the possession of the generator has been disclosed. I will notify Heritage Environmental Services, LLC, Heritage Thermal Services, Inc., Rineco Chemical Industries, LLC, or Heritage Thermal of Texas, LLC of any changes in generator status, any information on this form, or any information on the attachments. This certification and signature apply to this form, to all attachments checked in section 20, and to the land disposal restriction notification (LDR) generated from this information. For Lab Packs only: To the best of my knowledge, all labels on the inner and outer containers, and all information recorded on the packing inventory sheet for each Lab Pack, correctly identifies the contained chemicals where testing has been necessary to characterize material in the lab pack. I have used test methods equivalent to those specified in the Permittee's current operating permit Lab Pack Procedure.

COMMENTS OR REQUESTS:

GENERATOR'S CERTIFICATION

I certify that I am authorized to execute this document as an authorized agent. I hereby certify that all information submitted in this and attached documents is correct to the best of my knowledge. I also certify that any samples submitted are representative of the actual waste. If Clean Harbors discovers a discrepancy during the approval process, Generator grants Clean Harbors the authority to amend the profile, as Clean Harbors deems necessary, to reflect the discrepancy.

AUTHORIZED SIGNATURE

NAME (PRINT) Robert J. Scoble

RE: Generator ID Number : 224090
Wastestream : 224090-2
Waste Name : SOIL WITH VINYL CHLORIDE & BUTYL ACRYLAT

Dear Dan Hunt:

Heritage Environmental Services, LLC is notifying you, in accordance with 40 CFR Part 264.12(b) and equivalent State regulation, that we have the appropriate permits for treating, storing, or disposing of your hazardous waste. We will accept wastestream 224090-2 based on the information provided that was reviewed and approved by Heritage Environmental Services, LLC.

If there are any changes that occur at your facility or to the waste that has been approved that would affect the shipping, safe handling, or a regulatory classification, please provide an appropriate notice to Heritage concerning the waste approved for acceptance.

Thank you for your business.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ernest Walker", is written over a light blue horizontal line.

22. CERTIFICATION: Sign and date the certification. I hereby certify that I am an authorized agent of the generator, and warrant on behalf of the generator, that all information submitted herein and attached documentation contains true, accurate and complete descriptions of this material. Any sample submitted for analysis or attached laboratory data is representative of the material being offered for approval. All relevant information regarding known or suspected hazards in the possession of the generator has been disclosed. I will notify Heritage Environmental Services, LLC, Heritage Thermal Services, Inc., Rineco Chemical Industries, LLC, or Heritage Thermal of Texas, LLC of any changes in generator status, any information on this form, or any information on the attachments. This certification and signature apply to this form, to all attachments checked in section 20, and to the land disposal restriction notification (LDR) generated from this information. For Lab Packs only: To the best of my knowledge, all labels on the inner and outer containers, and all information recorded on the packing inventory sheet for each Lab Pack, correctly identifies the contained chemicals where testing has been necessary to characterize material in the lab pack. I have used test methods equivalent to those specified in the Permittee's current operating permit Lab Pack Procedure.

RE: Approval of Waste Profile at the Andrews, Texas facility for Waste Control Specialists LLC
HW Permit No. 50358, EPA ID. No. TXD988088464

Dear Mr. Hunt:

This letter is to inform you that Waste Control Specialists LLC (WCS) has the required permits necessary for acceptance and management of the material as submitted on the Waste Profile Form submitted for **Norfolk Southern Railway Company for Soil impacted with butyl acrylate and vinyl chloride (< 10 x UTS)**. This waste has been assigned a waste profile number of **WP-9984 Rev. 1** and this number must be used on all manifests and correspondence related to this waste stream. This approval is valid for twelve (12) months and expires on **March 28, 2024**.

Waste Control Specialists LLC is pleased to have the opportunity to provide you with the quality waste management services that you need. If you have any questions or need further assistance, please feel free to contact Customer Service at (432) 525-8729 or (432) 525-8651.

Section 3: Radioactive Waste Regulatory Status at the time of shipment to WCS (check only one option)

Waste is NOT regulated as NORM, TENORM, exempt radioactive waste or licensed radioactive waste. If Section 13 is not applicable, check this box.

Licensed Low Level Radioactive Waste (includes LLMW) that is considered:

- Commercial Waste generated in:
 - Texas and/or
 - Vermont
 - Any other state
- Federal Facility Waste

Radioactive Byproduct Material [11.e(2)] as defined by THSC §401.003(3)(B)

Waste will be radiologically exempt PRIOR to shipment (including exempt NORM)

Oil field NORM waste regulated by the Texas Railroad Commission that meets their exemption requirements

Section 4: Hazardous Waste Status (Check only one option)

- Waste **is not** considered RCRA Hazardous or Mixed Waste
- Waste **is** considered RCRA Hazardous or Mixed Waste, and is
 - Hazardous Waste that meets applicable 40 CFR 268 standards prior to receipt at WCS
 - Hazardous Waste that will require treatment (check only one):
 - Waste is subject to the treatment standards found in 40 CFR Part 268.40
 - Waste meets the definition of debris or lead per 40 CFR Part 268 - Macroencapsulation is a viable treatment method for this waste
 - Waste subject to the LDR alternative treatment standards for soil (40 CFR Part 268.49)

Section 5: Other Regulatory Statuses of Waste (check all that apply)

- PCB Waste regulated under TSCA: If checked, list maximum concentration of PCBs:
- Waste contains asbestos: If Checked, Is Asbestos Friable Non-Friable
- Waste contains beryllium; list maximum beryllium concentration:

Section 6a: Requested Processing Services

<input checked="" type="checkbox"/>	Direct Disposal - Waste will not require any processing prior to disposal
<input type="checkbox"/>	RCRA Treatment
<input type="checkbox"/>	WCS Dewatering / Void-Fill process

		Generator Certification Number:	TXWCSTWCS
<input type="checkbox"/>	Byproduct Disposal Facility		
<input type="checkbox"/>	Not Disposed at WCS		

Section 7: General Description

Waste Name:	Soil impacted with butyl acrylate and vinyl chloride (< 10 x UTS)
Process Generating Waste:	Remediation of train derailment (CERCLA site). Derailment resulted in releases of unused commercial grade vinyl chloride, butyl acrylate, 2-Butoxyethanol, ethylhexyl acrylate, isobutylene, ethanol (beer), lube oil, plastic pellets and flour and included 2 cars listed as "empty, last containing benzene" based on generator knowledge these cars meet the definition of RCRA empty containers. Approximately 40 gal of AFFF concentrate was utilized by local fire dept prior to NS arrival. SDS are attached

Section 8: RCRA Waste Codes

Selected RCRA Codes:
U043 - Vinyl chloride

Selected UHC Codes in ppm:
(No Underlying Hazardous Constituents)

REF: Quotation 154632 - SOIL IMPACTED WITH VINYL CHLORIDE (>10X UTS)

Dear Chad:

Thank you for offering Ross Environmental Services, Inc. (RES) the opportunity to quote Waste Product Survey(s) (WPS) # 154632. As regulation requires, I am providing the following statement on behalf of Ross Incineration Services, Inc. (RIS): The required waste stream evaluation has been completed for WPS # 154632. As part of that review, it has been determined that RIS has the appropriate permits for, and can accept, the waste that Green Rock Strategies LLC is shipping, subject to the terms and conditions of the Waste Management Agreement between RES and Green Rock Strategies LLC.

The USEPA recognizes that it is customary for transporters to modify the manifest with respect to transporter additions or substitutions, and that this activity as a common occurrence in the industry when providing waste management services. Therefore, as part of the E-Manifest rules effective June 30, 2018, amended regulatory provision 40 CFR 263.21 allows transporters to add or substitute transporters on the manifest with advanced contractual authorization to do so. We believe that our Waste Management Agreement ("WMA") and accompanying purchase orders provide the needed contractual authorization for these Services, and we will continue to fulfill your needs under the WMA.

Action Required for shipment:

- Please review the enclosed WPS(s). I have marked any items where modifications are suggested or where your input is needed. Please make any revisions necessary, complete any items left blank, then sign, date and **return all pages of the WPS(s)** to me.
- Please review the enclosed Waste Management pricing. You may use the pricing document provided as a purchase order or purchase order amendment if you wish by completing any items left blank. Sign, date and return the purchase order to me for processing.
- For transportation of this material, please refer to the previous quotation for Ross Transportation Services, Inc. (RTS).
- Vacboxes may require to be dropped for processing. Expect a 7-10 day receipt, sampling, and processing time upon delivery.

If you have any questions, please contact me at (440) 366-2048. If you would like to schedule a waste pick-up please contact the Logistics Department at (800) 783-6555. Thank you for the opportunity to be of service.

Sincerely,

Ethan Suran

Subject: Approval Number

Josh,

We are doing what we can to get as many items cleared up as possible

This is the proposed and preliminary approval number for the East Palestine hazardous water project: **13230211**. This number would be entered in Section 14 of the manifest.

This approval number is not active until the waste profile is signed and returned to us, we send you a confirmation (Sales & Pricing Agreement), and it signed by SPSI and returned.

Anything you do with this number like printing manifests is at your own risk. We will not accept any trailers for delivery that are not formally approved.

WASTE IDENTIFICATION/ACCEPTANCE: The Waste Profile Document provided by CUSTOMER describes Conforming Waste and is incorporated by reference into this Service and Pricing Agreement. TM DEER PARK SERVICES LLC (hereinafter "TMDP") is an appropriately permitted facility and will provide Waste Services for Conforming Waste at its facilities or the facilities of its affiliates, or may subcontract with other permitted facilities (including affiliates) for the Waste Services. However, use of an affiliate or subcontractor shall not relieve of its obligations under this Agreement. **SCHEDULING/SHIPPING:** Scheduling must be arranged through TMDPS by calling Scheduling at (281) 930-2540 between 8:00 AM - 5:00 PM Mon.-Fri. at least 48 hours in advance unless TMDP agrees otherwise. Shipments must travel with a Uniform Hazardous Waste Manifest and a Land Disposal Restriction Notification (LDRN), where applicable. CUSTOMER acknowledges that it has received and understands TMDP's procedures for entry and exit to and from its facilities and agrees to comply with such procedures. Any violation of these procedures by CUSTOMER or its agents shall for all purposes be considered material and TMDP shall have, in addition to any other remedy available, the option, in its sole discretion, to terminate this Agreement without prior notice, upon TMDP's determination, in its sole discretion, that CUSTOMER or any of its employees, invitees, contractors, or other agents are not in complete compliance with all such procedures.

EFFECTIVE DATE: This Service and Price Agreement shall be effective as of the date of acceptance by CUSTOMER.

ACCEPTANCE: The proposal for this Service and Price Agreement must be accepted by CUSTOMER within 30 calendar days from the Price Effective Date above or it shall be null and void. Acceptance by CUSTOMER shall be by (i) signature below and return to TMDP by facsimile, mail, electronic mail, over night service or USPS or (ii) in the event CUSTOMER has accepted an earlier service and price agreement in this form which adopted by reference TMDP Form No. DPW080424 by signature as provided for in Subsection (i) above, then acceptance of this Service and Price Agreement shall be considered completed by CUSTOMER upon CUSTOMER's delivery of Waste Material covered by this Agreement to TMDP.

General Terms and Conditions for Waste Services
by TM Deer Park Services Limited Partnership
TMDP Form No. DPW080424 as Modified for SPSI/Norfolk Southern Project
EFFECTIVE FEBRUARY 15, 2023

The following terms and conditions shall apply to all waste services performed by or under the control of TM DEER PARK SERVICES LIMITED PARTNERSHIP, including transportation, storage, treatment and disposal services.

1. Definitions

1.1 "Generator" shall mean TMDP's customer and/or any third-party generator of Waste Material for which the TMDP customer is acting.

1.2 "Party" shall mean either TMDP or Generator or both.

1.3 "TMDP" shall mean TM Deer Park Service LLC, a Limited Liability Company.

1.4 "Waste Material" shall mean those solid, liquid, semi-solid, or contained gaseous materials which are generally described in, and which have physical, chemical, biological or radioactive constituents, characteristics and properties within the specifications stated in Generator's waste profile document. The term "Waste Material" also includes containers supplied by Generator containing Waste Material such as a barrel, drum, tank or box.

1.5 "Waste Services" shall mean the handling, packaging, transportation, storage, processing, treatment, reclamation, recycling, recovery, incineration and/or disposal of Waste Material by TMDP or its affiliates or subcontractor(s).

2. In no event shall any term or condition attached or made part of a future purchase order, shipping document, manifest or other document associated with the Waste Material and/or Waste Services have any controlling effect unless specifically adopted in writing by an authorized representative of both TMDP and Generator making specific reference to both these Terms and Conditions and their amendment, supplement or modification.

3. Upon delivery of the Waste Material to TMDP, Generator shall tender to TMDP those completed documents, shipping papers or manifests as are required for lawful transfer of the Waste Material to TMDP by valid and applicable statutes, ordinances, orders, rules or regulations of the federal, state or local governments.

4. TMDP shall have the right, but not the obligation, to inspect, sample, analyze or test any tendered Waste Material before accepting such Waste Material.

5. A Waste Material shall be considered to be non-conforming if

5.1 the Waste Material is not materially in accordance with the specifications of the Generator's waste profile document, or

5.2 the Waste Materials

- (a) Materially increases the nature or extent of the hazard and risk undertaken by TMDP in agreeing to provide Waste Services, or
- (b) are such that TMDP's facility is not designated, permitted or authorized to provide the Waste Services by law, rule, or regulation.

6. If the Waste Material, any unit thereof, or the tender of delivery is non-conforming, TMDP may, at any time after its receipt of the Waste Material and at its exclusive option:

- (a) reject all Waste Material tendered, or
- (b) accept all Waste Material tendered; or,
- (c) accept any unit or units of Waste Materials and reject the rest.

Unless TMDP specifically provides to the contrary in writing, failure of TMDP to reject non-conforming Waste Material shall not be deemed acceptance of the non-conforming Waste Material. Upon rejection of Waste Material, Generator shall be responsible for all costs incurred by TMDP prior to such rejection and all costs of returning the Waste Material so rejected to Generator. Such costs shall include, but not be limited to, equipment or facility damage, remediation or corrective action, administrative and/or legal costs, as well as any fines and/or penalties. Acceptance of the Waste Material, or any unit thereof, does not, however, impair, or operate as a waiver of, any right or remedy available to TMDP in the event the Waste Material are later discovered to be non-conforming. Without limiting any other remedy available, Generator shall make prompt arrangements for the removal of the non-conforming Waste Material from TMDP's Facility to another lawful place of disposition. To the extent Generator delivers conforming Waste Material to TMDP but such conforming Waste Material becomes non-conforming Waste Material after such delivery, Generator shall not have any liability for, or

obligations to remove or remediate, any such non-conforming Waste Material as contemplated by this section; provided however, that the burden of proving that Waste Material was conforming at the time of delivery shall be on Generator.

7. Except as required by law, title to and ownership of the Waste Material shall at all times remain with Generator.

8. TMDP warrants and represents to Generator that:

8.1 TMDP is engaged in the business of and has developed the requisite expertise for providing Waste Services. All Waste Services provided by TMDP shall be performed utilizing the same standard of due diligence and reasonable care demonstrated by other companies within the industry providing similar Waste Services. All TMDP personnel, employees, agents, affiliates, subcontractors, and contractors engaged in providing the Waste Services shall be appropriately skilled and, where necessary, licensed to perform the work to which they are assigned; and,

8.2 Each facility, vehicle or any equipment in which TMDP provides Waste Services pursuant to these Terms and Conditions shall be in full compliance at all relevant times with all applicable environmental, health and safety legal requirements, including statutes, regulations, ordinances and common law; and,

8.3 TMDP will, and will ensure all persons referenced in Section 8.1 above who provide Waste Services for Generator hereunder will, provide Waste Services in a safe and workmanlike manner and in full compliance with all valid and applicable statutes, ordinances, orders, rules, regulations, and common law of the federal, state and local governments in whose jurisdictions such activities are performed; and,

8.4 No Waste Services will infringe any patent, trademark, copyright, trade secret or other intellectual property right owned or controlled by any other corporation, firm or person or other third party; and,

8.5 TMDP makes no other warranty, expressed or implied, other than as is specifically set forth above and none shall be implied. The warranties set forth above are exclusive and are given by TMDP and accepted by Generator in lieu of any and all other warranties, whether expressed or implied, all such warranties being hereby expressly disclaimed and waived by Generator.

9. Generator warrants and represents to TMDP that:

9.1 The description and specifications of the Waste Material in the Generator's waste profile document is or shall be true and correct in all material respects, that they fairly advises TMDP of the hazards and risks known by Generator to be incident to the Waste Services as requested by Generator and are otherwise in full compliance with all materials description requirements of valid and applicable statutes, ordinances, orders, rules and regulations of the federal, state and local government in whose jurisdictions such Waste Material is to be tendered to TMDP; and

9.2 Generator will promptly disclose to TMDP any and all information known to Generator relating to the Waste Materials that presents or may present a hazard or risk to persons, property, the environment or the ecosystem whether such information is received or developed by Generator before or after delivery of the Waste Material to TMDP; and,

9.3 Generator will comply with all valid and applicable statutes, ordinances, orders, rules and regulations, of the federal, state and local governments in whose jurisdiction such Waste Material is to be tendered to TMDP, pertaining to Generator and the Waste Material; and,

9.4 Unless otherwise specified in writing, Generator has sole title to the Waste Material which will be tendered to TMDP, and is not under legal restraint, statutory, regulatory, administrative or judicial, which prohibits the transfer of possession or title to such Waste Material to TMDP; and,

9.5 Except as specifically set forth in the applicable waste profile document, the Waste Material delivered to TMDP shall be free of all toxic, radioactive or hazardous chemicals, compounds or organisms and all medical waste which, if present in any waste stream, would bring the waste stream under the regulatory classification of hazardous or toxic within the meaning of any Federal, state or local law or regulation or the rules, regulations or otherwise present an risk or hazard to persons, property, the environment or ecosystem. The provision of this representation and warranty shall survive, for all purposes, the acceptance of or the failure to reject the Waste Material by TMDP.

10. Indemnification Provisions

10.1 Each Party agrees to defend, indemnify and hold the other Party and their respective affiliates and subsidiaries, and the respective affiliates, directors, officers, partners, members, employees and agents, harmless from and against any and all claims, liabilities, suits, proceedings, judgments, orders, fines, penalties, damages, losses, costs and expenses (including, without limitation, costs of defense, settlement and reasonable attorneys' fees and expenses) (all of the foregoing herein collectively called "Liabilities, Proceedings and Damages"), arising out of (i) the indemnifying Party's active or passive negligence, gross negligence or willful misconduct; and/or, (ii) failure of the indemnifying Party or any of its employees or agents to observe or comply with any of the indemnifying Party's duties or obligations under these Terms and Conditions, including, without limiting the generality of the foregoing, any failure to observe or comply with any applicable federal, state or local laws, ordinances, codes, orders, rules or regulations; violation

or breach of the warranty provisions in these Terms and Conditions. The foregoing obligations of indemnity will include, but not be limited to, any and all Liabilities, Proceedings and Damages for or relating to (i) injury to or death of any person (including, without limitation, employees or agents of the Parties), (ii) damage to or loss or destruction of any property (including, without limitation, property of the Parties, or their respective employees or agents), and (iii) any spill, release or leak of any hazardous substance or waste or any contamination of, injury or damage to, environmental impairment of or adverse effect on persons, animals, aquatic and wild life, biota, vegetation, waters, other natural resources, or the environment. Provided, however, the indemnifying Party shall be liable only for that percentage of total Liabilities, Proceedings and Damages that corresponds to the indemnifying Party's percentage of total active or passive negligence, gross negligence, willful misconduct or other fault as herein described above as it is compared to that of the indemnified Party. TMDP shall be liable hereunder to the extent any Waste Services are performed by TDMP's affiliates, subcontractors, or contractors.

10.2 Neither Party shall have any liability to the other Party for any indirect, incidental, aggravated, exemplary, punitive, or consequential damages incurred by the other Party, whether brought on an action for breach of contract, breach of warranty, tort, strict liability, or otherwise and irrespective of whether caused or allegedly caused by either Party's negligence and none shall be awarded by any tribunal against a Party hereto in favor of a Party hereto; provided, however, that the limitations on liability contained in this Section 10.2 shall not apply to damages caused by gross negligence or willful misconduct or to damages which are part of a third Party claim for which a Party hereunder is claiming an indemnity obligation under these Terms and Conditions from the other Party and the Party entitled to indemnity protection under these Terms and Conditions is seeking an indemnity or other relief against the payment of such damages from the Party required to provide such indemnity or other relief.

10.3 Those provisions of these Terms and Conditions which by their nature are intended to survive the termination, cancellation, completion or expiration of these Terms and Conditions shall continue as valid and enforceable obligations of the Parties, notwithstanding any such termination, cancellation, completion or expiration. Such provisions include, but are not limited to, provisions concerning warranties and indemnifications.

11. Whenever entering onto a TMDP facility, any employee, common carrier or other agent or representative of Generator shall comply with all reasonable requirements of TMDP imposed for purposes of safety, indemnity and/or insurance protection. Generator shall be responsible for any and all demurrage charges arising from the transportation of Waste Material.

12. PAYMENT TERMS: Effective as of February 15, 2023, TMDP will not extend credit terms in any amount for Waste Services provided to Generator. Waste Materials shall only be received by TMDP and Waste Services shall only be provided by TMDP if the mutually agreeable estimated fees and other charges have been deposited in advance via Electronic Funds Transfer through the Automated Clearing House (EFT/ACH) or similar electronic transfer protocol to the following TMDP bank account or any other bank account TMDP establishes:

Bank Name: Investar Bank
Bank Telephone: 225/227-2332
Account Name: TM Deer Park Services Limited Partnership
Routing #: 065405459
Account #: 4004080909
Fedwire: 065405459
SWIFT Code: tibbus44 TIB Dallas

Subject to the first and last paragraphs of this Section 12, this deposit amount will be an estimate for the subsequent week of expected waste deliveries and reconciled on a weekly basis in order to determine the next deposit amount. The reconciliation will be based on actual trucks and volumes delivered and Waste material disposed of according to the appropriate rates listed on the Service and Pricing Agreement. These payment terms shall remain in effect until mutual agreement is reached as to alternative payment terms. Funds deposited in the above described account shall bear no interest and none shall be credited to Generator's account nor paid to Generator. Upon Notice from Generator to TMDP that Waste Services will no longer be required, the balance of Generator's deposit(s), if any, in the above described account shall be returned to Generator by TMDP within seven (7) business days.

The Parties acknowledge that (i) absent the deposits described above, Waste Material will not be received by TMDP nor will Waste Services be provided by TMDP and (ii) the transfer of monies by customer to the above described bank account is intended by the Parties to be a contemporaneous exchange for new value given to customer by TMDP's Waste Service. Nothing in this Section 12 shall be construed as a requirement that TMDP will either receive Waste Material from Generator or provide Waste Services to Generator even though Generator may have a positive balance in any amount in the deposit account.

13. All fees and charges for Waste Services as may be set forth in any quotation, bid, service and pricing agreement, work order or purchase order are exclusive of any and all federal, state or local sales, excise, value added, environmental and/or use taxes (or other similar taxes). Payment (or reimbursement) of any such tax shall be the responsibility of Generator.

14. Except with respect to payments that are due and payable, neither Party shall be considered in default in the performance of its obligations or be subject to any liability if such performance is prevented or delayed on account of causes beyond the reasonable control of the affected party, including without limitation, war, hostilities, revolution, civil commotion, strike, epidemic, rain, fire, wind,

earthquake, flood, major equipment failure, labor dispute or because of any law, order, regulation or ordinance of any government, or of any subdivision thereof, or because of an Act of God.

15. TMDP shall consider all information received from Generator to be confidential and shall not disclose any such information to any third party except as required by law or as Generator may request or otherwise permit.

16. If any section or clause of these Terms and Conditions shall be adjudged illegal, invalid or unenforceable, such illegality, invalidity or unenforceability shall not affect the legality, validity or enforceability of these Terms and Conditions as a whole or of any section, subsection, sentence or clause hereof not so adjudged. In the event of a conflict between these general terms and conditions and the Service and Pricing Agreement to which these terms are attached and incorporated, the provisions of the Service and Pricing Agreement shall control.

17. These Terms and Conditions may be changed, modified or terminated only by a writing signed by both Parties. Any prior verbal agreements or understandings between the Parties pertaining to the Waste Services covered hereby are hereby terminated and/or superseded by these Terms and Conditions. The waiver of a breach of any term or condition shall not be deemed to constitute the waiver of any other breach of the same or any other term or condition hereof.

18. These Terms and Conditions shall be governed by and construed in accordance with the laws of the State of Texas without reference to the choice of law doctrine of such state. Any suit brought by either Party against the other Party for claims arising out of these Terms and Conditions and/or the Waste Services shall be brought in the federal courts of Harris County, Texas (or the state courts of Harris County in the event that such court does not have or declines jurisdiction), and the Parties hereto consent to the exclusive jurisdiction of such courts in respect of such action or proceeding. In the event of any litigation between the Parties arising from the Waste Services or these Terms and Conditions, the prevailing Party shall be awarded its costs of suit, including reasonable attorney's fees, as determined by such courts.

19. The relationship of TMDP to Generator is that of an independent contractor.

20. The Service and Pricing Agreement may be executed in any number of counterparts, each of which will be deemed to be an original copy of such agreement, and all of which, when taken together, shall be deemed to constitute one and the same agreement. Signatures transmitted by facsimile or other electronic means shall be accepted as originals for all purposes.

21. PROVISIONS REGARDING PIPELINE FOR DELIVERY OF WASTE MATERIAL

21.1 The Parties shall jointly develop a pipeline between the adjoining properties for the purpose of delivering Waste Material from Generator to TMDP (the "Pipeline"). Generator shall be fully responsible for the design, engineering, procurement, construction, operation, maintenance and repair of that portion of the Pipeline located on Generator's side of the fenceline. TMDP shall be fully responsible for the design, engineering, procurement, construction, maintenance and repair of that portion of the Pipeline located on TMDP's side of the fenceline. Generator shall be fully responsible to engineer and complete the tie-in of the two separate pipelines notwithstanding the point of connection vis a vis the fenceline and/or property line.

21.2 Anything in these General Terms and Conditions to contrary notwithstanding, in the event that any portion of the pipeline is inoperable for any period of time for any cause whatsoever, including, without limitation, negligence, recklessness or willful neglect, thus requiring the Waste Material to be shipped by Generator to TMDP (or other waste disposal site) via tanker trucks or other alternative means of conveyance, both Parties waive recovery of any damages resulting from the Pipeline outage and hold the other Party harmless from any such damage(s).

21.3 Generator, or its representative, is required to inspect that portion of the waste pipeline, which starts within Generator's plant from the source tank(s) to the point that the pipeline crosses into TMDP's property. Such inspections shall be performed in accordance with Generator's ordinary pipeline leak and damage inspection practices. TMDP will be responsible for that portion of the Pipeline from its fenceline to the terminating tank(s) and will perform similar leak and damage inspections in accordance with its customary practices and policies and procedures. To the extent a Party has an inspection form (but, for the avoidance of doubt, such form is not required), it shall contain the following general language "For each unit, indicate pass or fail for the associated inspection criteria. Any failure noted during the inspection requires corrective action. If corrective action is required and can be immediately resolved, note the deficiency and the corrective action taken. If the corrective action cannot be immediately resolved, a remedial work order will be generated and noted." A Party's Pipeline inspection records shall be provided to the other Party as such Party may reasonably request. In addition, any deficiency or other work performed on the Pipeline, will require the Party identifying the failure to notify the other Party promptly. In the unlikely event of Pipeline failure resulting in a release of waste to the environment, the Party responsible for clean-up and any other corrective action shall be determined by the point of failure and where that point of failure is located (unless such point of failure is the result, in whole or in part by, the grossly negligence acts or omissions of the other Party) provided, however, in the event that the released Waste Material does not meet the waste profile and such excursion results in additional costs of remediation, such additional costs shall be the responsibility of Generator. Leak Detection and Response (LDAR) monitoring on the Pipeline is required in accordance with 40 CFR Subpart BB and shall be performed by each Party as to that portion of the Pipeline located on that Party's property. A Party's LDAR records shall be provided to the other Party as reasonably requested.

21.4 Prior to each transfer of Waste Materials from the source Generator tank to TMDP, Generator shall submit a completed and signed LDRN and sample of the source tank to TMDP. TMDP upon receipt of the Land Disposal Restrictions Notification (LDRN), will issue a workorder to record the characteristics of the sample and acknowledge that the sample conforms to the profile as required by TMDP's Waste Analysis Plan (WAP). Only upon receipt of the aforementioned workorder, Generator may begin to transfer the Waste

Material to TMDP's receiving tank. The transfer may be halted for any reason by either Party, including, but not limited to, a pipeline failure TMDP's receiving tank is reaching capacity; or, TMDP's sampling of the receiving tank indicates that the material is no longer conforming to the approved profile. Reasonable surcharges may apply or a rejection of the material may occur if the Waste Material received is found to be no longer conforming to the profile.

VI. COMPONENTS: Account for 100% of the waste components. Include metals, UHCs, TRI-reportable chemicals, etc.

CAS # (Optional)	Constituent	Range	Unit	CAS # (Optional)	Constituent	Range	Unit
	water	95 - 99	%		Ethylbenzene	0 - .009	ppm
	Vinyl chloride	0.022 - 0.290	ppm		Methylcyclohexane	0 - .002	ppm
	2-ethylhexyl Acrylate	0 - 0.1	%		Toluene	0 - .02	ppm
	butyl Acrylates	0 - 0.1	%		Xylene	.003 - .045	ppm
	Diethylene Glycol	0 - 0.1	%		2-Methylnaphthalene	0 - .024	ppm
	Lube oil	0 - 0.1	%		Acenaphthene	0 - .020	ppm
	MEK	0 - .052	ppm		Acenaphthylene	0 - .019	ppm

Waste characterization determined by: Process Knowledge Waste Analysis (Provide copy) MSDS/SDS(s) (Provide copy)

VII. Certification

I hereby certify and warrant that the information supplied on this form, and any attachments, represents a complete and accurate identification and description of this waste material, its constituents and its known or suspected hazards. I further certify and warrant that this information is the result of an analysis of a representative sample of the waste obtained and analyzed in accordance with testing procedures of the U.S. Environmental Protection Agency or by the application of knowledge of the process generating the waste materials per EPA Guidelines.

SEE Attached Analytical Report: 240-180173, Sample IDs: WC-02/2023-02-09, WC-04/2023-02-09, WC-05/2023-02-09
 NOTE: WC-02 = Tank 505E, WC-04= Tank 514E, WC-05= Tank 566E

PROCESS OF GENERATION: Derailment involving 5 railcars of unused commercial grade vinyl chloride (VC). Derailment also involved releases of butyl acrylate, ethyl hexyl acrylate, 2-butoxyethyl acetate, ethylene glycol monobutyl ether acetate, lube oil, and isobutylene. Waste stream is water generated from interceptor trenches, dams & surface puddles and may contain any/all of the released products (SDS attached). Based on gauging data waste stream contains < 0.02" of LNAPL. Waste determination based on generator knowledge of chemicals released, concentrations of VC & Flashpoint in other frac tanks. During response ~ 40 gal PFAS containing AFFF was used. During first week of response activities 200K gallons of water was generated (40 gal AFFF/200K gal water = 0.02% AFFF)

Confirmation Letter

Tuesday, February 14, 2023

Page 1 of 2

We are pleased to confirm Vickery Environmental, Inc's approval of your waste material as described below. The attached profile for the waste materials was prepared by VEI based upon information provided by you. It is important that no changes be made to the profile without VEI's consent. If the profile meets with your approval, please email Vickeryscheduling@wm.com or call 419/547-7791 to schedule shipment of your waste materials.

Contact Person:	JOSH LINDLEY
Customer Name:	SPECIALIZED PROFESSIONAL SVCS
Profile Number:	OH895850
Waste Name:	WATER IMPACTED WITH VINYL CHLORIDE
Expiration Date:	12/31/2023
Quote Number:	4904
Quote Date:	2/14/2023

ALL PRICING BELOW IS GOOD THROUGH 12/31/22 OR WITH 30 DAYS WRITTEN NOTICE

Approved Mgmt. Facility:	Vickery Environmental, Inc.
Additional Information:	All loads must be pre-scheduled at least 24 hours in advance, through Vickery Environmental scheduling at Vickeryscheduling@wm.com or call (419) 547-7791.

Vickery receiving hours are as follows:

Monday through Friday, 7:00 am. to 4:00 pm.
 Closed Saturday, Sunday and Holidays except in cases of emergency.

Material must conform to site acceptance criteria:

- Oil <5%
- VOC's <5%
- Flashpoint >212 F
- PCB's <25 ppm non-TSCA
- Cyanide <250 ppm reactive
- Sulfide <500 ppm reactive
- Non-Infectious and Non-Radioactive , no TENORM
- No fuming material
- Liquid/pumpable and compatible with process

Tuesday, February 14, 2023

Page 2 of 2

A Land Disposal Notification and Certification Form must accompany each shipment for all EPA regulated hazardous waste.

All unpaid invoices over 30 days old, may be assessed a finance charge at the rate of 1.5% per month or per Contract.

Applicable state and local taxes are not included in these disposal prices. All wastes are priced as profiled, invoiced as actually received. Invoices shall be paid no later than thirty (30) days from the date of receipt. All terms are governed by the Agreement previously executed between our companies. The prices quoted above are subject to change by VEI upon thirty (30) days' prior written notice to you unless otherwise specifically provided or per the terms of our Agreement.

If you have any questions or would like to make changes to the profile, please contact your representative. Thank you for this opportunity to be of service.

CAROLYN GOLAMB

G. GENERATOR CERTIFICATION (PLEASE READ AND CERTIFY BY SIGNATURE)

By signing this EZ Profile™ form, I hereby certify that all information submitted in this and all attached documents contain true and accurate descriptions of this material, and that all relevant information necessary for proper material characterization and to identify known and suspected hazards has been provided. Any analytical data attached was derived from a sample that is representative as defined in 40 CFR 261 - Appendix 1 or by using an equivalent method. All changes occurring in the character of the material (i.e., changes in the process or new analytical) will be identified by the Generator and be disclosed to Waste Management prior to providing the material to Waste Management.

- I am an Authorized Agent signing on behalf of the Generator, and I have confirmed with the Generator that information contained in this profile, as well as supporting documents provided, are accurate and complete.

Only complete this Addendum if prompted by responses on EZ Profile™ (page 1) or to provide additional information. Sections and question numbers correspond to EZ Profile™.

Profile Number: OH895850

C. MATERIAL INFORMATION

Describe Process Generating Material (Continued from page 1): _____ If more space is needed, please attach additional pages.

Isobutylene. Waste stream is water generated from interceptor trenches, dams, & surface puddles and may contain any/all of the released products. Waste determination based on generator knowledge of chemicals released, concentrations of VC&Flashpoint in other frank tanks. During response, approximately 40 gallons of PFAS containing AFFF was used (Approximately 0.02 % AFFF)

Material Composition and Contaminants (Continued from page 1): _____ If more space is needed, please attach additional pages.

5.	
6.	
7.	
8.	
9.	
Total composition must be equal to or greater than 100%	
	≥100%

D. REGULATORY INFORMATION

Only questions with a "Yes" response in Section D on the EZ Profile™ form (page 1) need to be answered here.

1. EPA Hazardous Waste

a. Please list all USEPA listed and characteristic waste code numbers:

- b. Is the material subject to the Alternative Debris standards (40 CFR 268.45)? Yes No
 - c. Is the material subject to the Alternative Soil standards (40 CFR 268.49)? → If Yes, complete question 4. Yes No
 - d. Is the material exempt from Subpart CC Controls (40 CFR 264.1083)? Yes No
- If Yes, please check **one** of the following:
- Waste meets LDR or treatment exemptions for organics (40 CFR 264.1082(c)(2) or (c)(4))
 - Waste contains VOCs that average <500 ppmw (CFR 264.1082(c)(1)) – will require annual update.

2. State Hazardous Waste → Please list all state waste codes: _____

3. For material that is Treated, Delisted, or Excluded → Please indicate the category, below:

- Delisted Hazardous Waste Excluded Waste under 40 CFR 261.4 → Specify Exclusion: _____
- Treated Hazardous Waste Debris Treated Characteristic Hazardous Waste → If checked, complete question 4.

4. Underlying Hazardous Constituents → Please list all Underlying Hazardous Constituents:

5. Industries regulated under Benzene NESHAP include petroleum refineries, chemical manufacturing plants, coke by-product recovery plants, and TSDFs.

- a. Are you a TSDF? → If yes, please complete Benzene NESHAP questionnaire. If not, continue. Yes No
 - b. Does this material contain benzene? Yes No
 - 1. If yes, what is the flow weighted average concentration? _____ ppmw
 - c. What is your facility's current total annual benzene quantity in Megagrams? <1 Mg 1–9.99 Mg ≥10 Mg
 - d. Is this waste soil from a remediation? Yes No
 - 1. If yes, what is the benzene concentration in remediation waste? _____ ppmw
 - e. Does the waste contain >10% water/moisture? Yes No
 - f. Has material been treated to remove 99% of the benzene or to achieve <10 ppmw? Yes No
 - g. Is material exempt from controls in accordance with 40 CFR 61.342? Yes No
- If yes, specify exemption: _____

h. Based on your knowledge of your waste and the BWON regulations, do you believe that this waste stream is subject to treatment and control requirements at an off-site TSDF? Yes No

6. 40 CFR 63 GGGGG → Does the material contain <500 ppmw VOHAPs at the point of determination? Yes No

7. CERCLA or State-Mandated clean up → Please submit the Record of Decision or other documentation with process information to assist others in the evaluation for proper disposal. A "Determination of Acceptability" may be needed for CERCLA wastes not going to a CERCLA approved facility.

8. NRC or state regulated radioactive or NORM Waste → Please identify Isotopes and pCi/g: _____

1. EPA Hazardous Waste

a. Please list all USEPA listed and characteristic waste code numbers (Continued from page 2):

2. Form Code:

3. Source Code:

LAND DISPOSAL RESTRICTION (LDR) NOTIFICATION AND CERTIFICATION FORM (PHASE IV)

Generator Name: Norfolk Southern Railway Co

Profile Number: OH895850

Manifest Number: _____

Ref. #	2. US EPA HAZARDOUS WASTE CODE(S)	3. SUBCATEGORY ENTER THE SUBCATEGORY DESCRIPTION (If not applicable, simply check NONE)		4. HOW MUST THE WASTE BE MANAGED? ENTER LETTER FROM BELOW
		DESCRIPTION	NONE	
1.	U043	N/A	<input checked="" type="checkbox"/>	A
2.			<input type="checkbox"/>	
3.			<input type="checkbox"/>	
4.			<input type="checkbox"/>	

- Is this waste a non-wastewater or wastewater? (See 40 CFR 268.2) Check ONE: Non-Wastewater Wastewater
For hazardous debris meeting the definition of debris and subject to the alternate treatment standards in 268.45, check here:
- In **column 2**, identify ALL USEPA hazardous waste codes that apply to this waste shipment, as defined by 40 CFR 261.
• To list additional waste code(s) use Land Disposal Notification/Certification Supplemental Form (CWM-2005-D) and check here:
- In **column 3**, for each waste code, identify the subcategory if one applies, or check NONE if the waste code has no subcategory.
- In **column 4**, enter the letter from the list below (A. – D.) that describes how the waste must be managed to comply with the land disposal restriction regulations in 40 CFR 268. Please note that if you enter B.1, B.3, B.6 or D, you are certifying that the waste meets all the Land Disposal Restrictions and may be landfilled without further treatment. If you enter B.4, you are certifying that the waste has been decharacterized, but still requires treatment for UHCs. (States authorized by EPA to manage the LDR program may have regulatory citations different from the 40 CFR citations listed on this form. Where these regulatory citations differ, your form will be deemed to refer to those state citations as well as 40 CFR.)
- Constituents of concern for waste codes F001-F005 and F039 and underlying hazardous constituents (UHCs) for D001-D043, must be identified unless the treatment facility will monitor for all constituents. **If any of these codes apply, check appropriate box below:**
• To identify constituents of concern for F001-F005, F039 and UHCs, use the Identification of Constituents of Concern Form (CWM-2007) and check here:
• If UHCs are applicable, but none are present at the point of generation, check here:
• If incineration facility will monitor for all constituents of concern (except dioxins), check here:

MANAGEMENT METHODS

A RESTRICTED WASTE REQUIRES TREATMENT

This waste must be treated to the applicable treatment standards set forth in 40 CFR 268.40.

B.1 RESTRICTED WASTE TREATED TO PERFORMANCE STANDARDS

"I certify under penalty of law that I personally have examined and am familiar with the treatment technology and operation of the treatment process used to support this certification. Based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process had been operated and maintained properly so as to comply with the treatment standards specified in 40 CFR 268.40 without impermissible dilution of the prohibited waste. I am aware there are significant penalties for submitting a false certification including the possibility of fine and imprisonment."

B.3 GOOD FAITH ANALYTICAL CERTIFICATION FOR INCINERATED ORGANICS

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification. Based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the non-wastewater organic constituents have been treated by combustion units as specified in 268.42 Table 1. I have been unable to detect the non-wastewater organic constituents despite having used best faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

B.4 DECHARACTERIZED WASTE REQUIRES TREATMENT FOR UNDERLYING HAZARDOUS CONSTITUENTS

"I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 or 268.49, to remove the hazardous characteristic. This de-characterized waste contains underlying hazardous constituents that require further treatment to meet treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

B.6 RESTRICTED DEBRIS TREATED TO ALTERNATE PERFORMANCE STANDARDS

"I certify under penalty of law that the debris has been treated in accordance with the requirements of 40CFR 268.45. I am aware that there are significant penalties for making a false certification, including the possibility of fine and imprisonment."

C. RESTRICTED WASTE SUBJECT TO A VARIANCE

This waste is subject to a national capacity variance, a treatability variance, or a case-by-case extension. Enter the effective date of prohibition in column (4) above.

D. RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

"I certify under penalty of law I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and LAC 33: V. 2223-2233. I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

I hereby certify that all information submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.
